*Sight-Reading* Leonhard Deutsch,2011-03-23 Sight reading is a skill which offers a student access to all music literature a skill through which he can acquaint himself with any composition unaided by a teacher Nor can the ability to sight read be lost Once musical notation has become a living picture for the student it will remain so and he will at any time afterward be able to perform any music whether he practices regularly or not Sight reading does not conflict with repertoire study On the contrary a good sight reader has no trouble in perfecting a piece and is all the more stimulated to do so After a student has developed adequate facility in sight reading he is ready for unrehearsed or little rehearsed performance this is especially important for chamber musicians and accompanists Also to musicians in other fields who take piano lessons as an additional subject sight reading will be very welcome Thus it is suitable for every piano pupil For the amateur student however the sight reading method is imperative Not only does it direct him to an appropriate goal developing musicianship but it also helps him

to attain it It is not the privilege of especially talented persons To play a piano piece correctly at sight implies nothing more than a coordination of the player s ears eyes and hands Every normal person can develop that coordination though it may mean hard work for some The efficacy of sight reading has been proven by my own teaching experience and by that of my co workers over a period of a great many years with numerous students of all ages and types Most of our students would have failed under traditional instruction Many actually had failed but they resumed their piano studies with our new approach and then succeeded
