Ibp, 2015-06-22 Ukraine Investment and Business Guide Volume 1 Strategic and Practical Information *Information Agglomeration of Japanese Auto Parts Suppliers* Yosuke Takeda, Ichihiro Uchida, 2024-09-14 This book explains information agglomeration a new concept we devise under the influence of Hidalgo 2015 Our concept of information agglomeration applies to an economy with horizontal divisions while an ordinary concept of industry agglomeration means spillover effects of corporate firms on another ones in vertically integrated industries In a horizontally divided economy of a society in which the capacities of individuals greatly surpass their individual knowledge as Hidalgo 2015 envisages the combinatorial creativity emerges from our species ability to crystallize imagination Consequently it is likely that information agglomerates in such knowledge oriented economies We take the Japanese auto parts suppliers for example The production system in which highly modularized products are crafted by skilled labors and multipurpose machines was called flexible specialization instead of mass production by Piore and Sabel 1984 However the conventional economics of transaction costs pioneered by Ronald Coase and Oliver Williamson suggests that it is costly for dispersed organizational networks to make and sustain creational links to accumulate vast volumes of knowledge information We wonder what has made information agglomeration

possible for the Japanese auto parts suppliers with the flexible specialization What has lowered the transaction costs associated with the organizational links We consider what causes the information agglomeration to amplify in the supply chains constructing economic models of some hypotheses on the driving forces of information agglomeration and utilizing firm level and establish level micro data to empirically test these hypotheses Finally based on the empirical evidence on information agglomeration we shed light on whether fast evolving automobile manufacturing in Japan that autonomous driving technology is likely to exert traction on
