radicalisation to reconsider the relationship between instrumentalist ideologies shaping education and the multiple forms of extremism that exist Beginning with a detailed discussion of the complicated and contested nature of different forms of extremism including extremism of both a religious and secular nature the authors show that common assumptions in contemporary discourses on education and extremism are problematic Chapters in the book provide a careful selection of pertinent and topical case studies policy analysis and insightful critique of extremist discourses Taken together the chapters in the book make a powerful case for re engaging with liberal education in order to foster values of individual and social enrichment intellectual freedom criticality open mindedness flexibility and reflection as antidotes to extremist ideologies Recognising recent criticisms of liberalism and liberal education the authors argue for a new understanding of liberal education that is suitable for multicultural societies in a rapidly globalising world This book is essential reading for academics researchers and postgraduate students with an interest in religion citizenship education liberalism secularism counter terrorism social policy Muslim education youth studies and extremism It is also relevant to teacher educators teachers and policymakers

Transport and accessibility to public services Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2013-06-24 This report looks at progress on improving accessibility since 2003 and ways of improving accessibility Problems with transport provision and the location of services can reinforce social exclusion by preventing people from accessing key local services and undermines government policies to tackle worklessness increase participation in education reduce crime and narrow health inequalities Insufficient progress has been made since the 2003 Social Exclusion Unit s Making the Connections report many findings of which are relevant today There is evidence that accessibility is worsening driven by tight budgets in central and local government Accessibility statistics show travel times to key services steadily increasing over time particularly for access to hospitals The Department for Transport needs to focus more closely on improving accessibility as well as on supporting the economy Existing transport funding could be better coordinated and directed to accessibility focused initiatives which will have a swifter impact on people s well being than large infrastructure projects The social value of transport and accessibility needs to be explicitly considered in policy making and in the planning system and should no longer be seen as a second order criterion The Committee believes it will take time for any improvements to make a noticeable difference Their recommendations focus on improving how government operates rather than funding Central government cannot abdicate its role in coordinating action across departmental silos and helping local authorities and service providers to share best practice Accessibility planning introduced by Making the Connections has had limited success and needs to be re energised
