The Nature of Race Ann Morning, 2011-06-24 What do Americans think race means What determines one s race appearance ancestry genes or culture How do education government and business influence our views on race To unravel these complex questions Ann Morning takes a close look at how scientists are influencing ideas about race through teaching and textbooks Drawing from in depth interviews with biologists anthropologists and undergraduates Morning explores different conceptions of race finding for example that while many sociologists now assume that race is a social invention or construct anthropologists and biologists are far from such a consensus She discusses powerful new genetic accounts of race and considers how corporations and the government use scientific research for example in designing DNA ancestry tests or census questionnaires in ways that often

reinforce the idea that race is biologically determined Widening the debate about race beyond the pages of scholarly journals

The Nature of Race dissects competing definitions in straightforward language to reveal the logic and assumptions underpinning today's claims about human difference

In the Womb Peter Tallack, 2006 Imagine being able to observe with astonishing clarity a child's delicate features as they evolve over the course of a pregnancy or witness the complex behavior of new human life in utero Now we can thanks to the advent of innovative 3D and 4D imaging technologies that provide a powerful diagnostic tool for doctors and cast vivid light on our earliest development and a profound new way for parents to bond with their babies on a deeper emotional level Each spread features a central image and information about that particular stage as well as brief commentary explaining what we know and how we know it For example at 24 weeks we watch a fetus open and close her eyes display facial expressions resembling a grimace and a frown and stick out her tongue no one has yet established exactly why And during the last trimester we learn she experiences REM sleep and can hear loud noises through the fluids of her mother's body a first hint of the world that awaits outside the womb

Modern Caveman Brett L. Markham, 2014-05-06 Nature spent millions of years forging genetic code so that you could be strong fit and healthy throughout your life Yet when we look around we see an epidemic of obesity autoimmune diseases young people with diabetes and people succumbing to heart disease in early middle age Why Though nature versus nurture has long been at the heart of debates concerning psychology and sociology it is only in the past few years that idea of conforming our diet and exercise to our genome has gained traction And it is precisely this idea that holds the key to unlocking your potential to be happier healthier and more fit than most can imagine is possible Why didn't our Paleolithic forebears suffer from tooth decay at all yet dentists' offices must now be ubiquitous in our society Why is it that middle aged men who are gobbling whole grains by the bushel and eating tofu to banish meat from their diets are still requiring expensive life time statin drug prescriptions to control their cholesterol The Modern Caveman Diet tries to answer these questions describing an evolutionarily healthful lifestyle of diet living patterns and exercise that are easily adopted and maintained throughout life Are you ready to fulfill the true destiny that nature has given you The Modern Caveman Diet holds the answer to achieving and maintaining a great body strength energy and active wellness right into a healthy old age with dramatically decreased risks of diseases of civilization

Natural History Notes ,1881 Shaping the History of Education? Jeroen Dekker, Frank Simon,2018-02-05 In 1961 the Centre for the Study of the History of Education at Ghent University Belgium published the first issue of the multilingual journal Paedagogica Historica International Journal of the History of Education This book celebrates its fiftieth volume In fourteen contributions written by different generations of historians of education it demonstrates that in an era where the history of education at university level is at risk both the journal and the discipline are pulsing and alive and kicking Was the journal a trendsetter or a follower and which position did it take with respect to the International Standing Conference for the History of Education These are questions addressed in the first section of this book In the second section a number of articles show national and transnational developments of the history of education In their diversity they make clear how the national and the transnational together characterize the discipline They show why journals in this domain should stimulate the development of broader concepts and theories in order to put national and regional cases in a broader scientific context and to make them attractive for international readership In the last section authors turn their minds to the future of the history of education They write about the shaping of new trends and about moving beyond borders focusing on among other things the challenge of neurosciences and of digital humanities This book was originally published as a special issue of Paedagogica Historica *The Sense of Self* Richard W. Sears,2016-11-30 At the heart of this book is one of the most ancient and profound question philosophers spiritual seekers and curious individuals have pondered since the beginning of history Who am I Advances in modern science and access to Zen tradition have provided us with broader and richer understanding of this topic Over the chapters the author a psychologist and Zen master investigates how the brain fosters a sense of an independent self situating his research in the contexts of neuroscience ecology evolution psychology and of the principles Eastern wisdom traditions The book explores a broad range of insights from brain science evolutionary biology astronomy clinical psychology thoughts and emotions mental health disorders and Zen Buddhism This book will appeal to psychologists psychiatrists social workers counsellors and researchers of Eastern traditions General readers interested in the functioning of the brain will discover practical ways to integrate fascinating new findings on an age old question into their everyday life

Tucker,2020-07-10 **The United States Catalog** Mary Burnham,Carol Hurd,1928 Medical Books and Serials in Print,1984 *Transgenerational Colonialism* Karel James Bouse,2021-04-14 In *Transgenerational Colonialism* Karel James Bouse offers an alternative and holistic model for the analysis of colonialism and its effects on humanity Using the current anti colonialist struggle in Northern Ireland as a representative case study Bouse illustrates her theoretical model by tracing the onset of trauma to the eventual overcoming period evidenced by a cultural renaissance a reconstruction of collective positive identity and political self determination This book is recommended for students and scholars of psychology history political science and cultural studies as well as those interested in the cyclical nature of colonial experience Evolution in Perspective Rodger W. Bybee,2004 This collection comes from and is developed for educators who deal with the controversy over evolution every day From a practical standpoint the book can help address the subject in the classroom and from a substantive standpoint it provides a remarkable overview of the state of teaching evolution in America *The Harvard Sampler* Jennifer M. Shephard,Stephen M. Kosslyn,Evelynn M. Hammonds,2011-10-15 From Harvard University comes essays sampling topics at the forefront of academia in the twenty first century Eminent faculty members invite readers to explore subjects as diverse as religious literacy cyberspace security epidemiology questions in evolution the dark side of the American Revolution and the biology of the human mind **The New Eugenics** Conrad B. Quintyn Ph.D.,2020-12-17 The specter of early twentieth century eugenics with its goal of preventing the unfit from reproducing through forced sterilization still haunts us in this era of genetic engineering Conrad B Quintyn an associate professor of biological anthropology at Bloomsburg University Bloomsburg Pennsylvania calls this the new eugenics era because geneticists have begun to explore ways to prevent and repair defective genes in all humans In this book he considers whether genetic engineering will exacerbate social injustices and or lead to a public safety issue For instance in 2012 virologists in the U S and the Netherlands genetically engineered avian bird flu to be more transmissible between mammals These scientists argued that virus transmission between mammals enables us to make vaccines to prevent pandemics They never considered what would happen if the virus accidentally escaped the laboratory Meanwhile some scientists are experimenting with designer babies altering genes to remove diseases and even programming certain traits Join the author as he considers whether scientists are playing God as well as the risks we face by altering genetics in *The New Eugenics* Bowker's Medical Books in Print ,1975
