Meeting at Grand Central Lee Cronk, Beth L. Leech, 2013 Meeting at Grand Central brings together insights from evolutionary biology political science economics anthropology and other fields to explain how the interactions between our evolved selves and the institutional structures we have created make cooperation possible The book begins with a look at the ideas of Mancur Olson and George Williams who shifted the question of why cooperation happens from an emphasis on group benefits to individual costs It then explores how these ideas have influenced our thinking about cooperation coordination and collective action The book persuasively argues that cooperation and its failures are best explained by evolutionary and social theories working together Selection sometimes favors cooperative tendencies while institutions norms and incentives encourage and make possible actual cooperation Publisher's website
