*The Next Generation of STEM Teachers* Patrick M. Jenlink, Karen Embry Jenlink, 2019-04-13 STEM Teaching An Interdisciplinary Approach breaks from the more historical idea of making knowledge within disciplines and seeks to engage the reader in a growing conversation that is gaining momentum and is focused on an interdisciplinarity of STEM education which seeks to embrace and or present emerging perspectives on the standards Importantly the conversation on STEM education and interdisciplinary approaches to teacher preparation may draw into specific relief the respective professional and or disciplinary standards for each of the four STEM disciplines as each relates to fostering an interdisciplinary approach The importance and relevance of this interdisciplinary perspective to teacher preparation lies in the realization that STEM literacy moves into everyday lives and thinking and not just in STEM related disciplines This means that faculty in teacher preparation need to extend the range of STEM literacy in pedagogical strategies so that STEM teaching is enriched with multimodal literacies into teaching and learning which in turn makes STEM knowledge more relevant and engaging for its manifest connections to solving the problems that challenge society      **Intelligent Computer Mathematics** Manfred Kerber, Jacques Carette, Cezary Kaliszyk, Florian Rabe, Volker Sorge, 2015-06-22 This book constitutes the refereed proceedings of the International Conference on Intelligent Computer Mathematics CICM 2015 held in Washington DC USA in July 2015 The 16 full papers and 9 short papers presented together with two invited talks plus one abstract were carefully reviewed and selected from a total of 43 submissions The papers are organized in topical sections following the tracks of the conference Invited Talks Calculemus Digital Mathematics Libraries Mathematical Knowledge Management Projects and Surveys Systems and Data      **Making School Maths Engaging** Anne Prescott, Mary Coupland, Marco Angelini, Sandra Schuck, 2020-10-19 This book provides an account of a large scale national STEM initiative in Australia the Maths Inside Project which is designed to increase secondary school students engagement and participation in mathematics The project s modules include videos illustrating how scientists use mathematics to find solutions to real world problems as well as themed activities linked to the school curriculum for mathematics Outlining the current debates concerning mathematics education in Australia and beyond the book describes the development and implementation of the modules to guide their use by teachers in year 8 12 Australian mathematics classrooms It concludes with a discussion of the research showing how the project increased student engagement The book discusses the partners involved in the project including scientists a national mathematics teachers association and the authors university It also offers insights into how to embark on pedagogical improvement through collaboration between individual institutional stakeholders Providing details of the modules to enable teachers and teacher educators to help their students better understand and utilise the curriculum resources of Maths Inside the book is a useful resource for educators around the globe wanting to make mathematics engaging topical and relevant for secondary school students      **STEM Education 2.0** Alpaslan Sahin, Margaret J.
