History and Precedent in Environmental Design Anatol Rapoport, 2013-06-29 This book is about a new and different way of approaching and studying the history of the built environment and the use of historical precedents in design However although what I am proposing is new for what is currently called architectural history both my approach and even my conclusions are not that new in other fields as I discovered when I attempted to find supporting evidence In fact of all the disciplines dealing with various aspects of the study of the past architectural history seems to have changed least in the ways I am advocating There is currently a revival of

interest in the history of architecture and urban form a similar interest applies to theory vernacular design and culture environment relations After years of neglect the study of history and the use of historical precedent are again becoming important However that interest has not led to new approaches to the subject nor have its bases been examined This I try to do In so doing I discuss a more rigorous and I would argue a more valid way of looking at historical data and hence of using such data in a theory of the built environment and as precedent in environmental design Underlying this is my view of Environment Behavior Studies CEBS as an emerging theory rather than as data to help design based on current theory Although this will be the subject of another book a summary statement of this position may be useful Glencoe Science McGraw-Hill Staff,2001-08 *The Environment* Mohan K. Wali,Fatih Evrendilek,M. Siobhan Fennessy,2009-07-30 Strongly grounded in the scientific method and evidence The Environment Science Issues and Solutions presents an organized accessible building block approach that introduces the principles of ecology This book examines the effects of technology use and the unprecedented economic growth and development that has tipped the natural balance of the environment resulting in serious local regional and global environmental problems This comprehensive text explores the need for interrelated long term solutions for the prevention and mitigation of environmental problems
