increase in the prevalence of obesity in virtually every country in the world As obesity is known to lead to both chronic and severe medical problems it imposes a cost not only on affected individuals and their families but also on society as a whole In Europe the Obesity Prevention White Paper of May 2007 followed by the adoption of an EU School Fruit Scheme the acknowledgement that food advertising to children should be limited and proposed legislation to make nutrition labeling compulsory has firmly placed obesity on the EU agenda by laying down a multi sectoral strategy and a basis for future action In accordance with this growing sense of urgency this is the first book to offer an in depth legal analysis of obesity prevention with particular reference to Europe It describes what the EU has done and could do to support Member States in fighting the obesity epidemic and clearly shows the way to locating advocacy strategies within the framework of EU law The thorough analysis includes a discussion of the following issues the need to address nutrition and physical activity as important health determinants the emphasis traditionally placed at EU level on food safety rather than food quality the need for the development of databases on nutrition and physical activity comparable common indicators and risk assessment mechanisms mainstreaming public health into all EU policies the scope of EU powers in the case law of the Court of Justice the role of information in the EU s obesity prevention strategy the Commission s proposed Mandatory Nutrition Declaration the Food Claims Regulation the regulation of food marketing to children and in particular the role of the Audiovisual Media Services Directive the Unfair Commercial Practices Directive and industry self regulation food reformulation the use of economic instruments in the EU s obesity prevention strategy with an emphasis on the Common Agricultural Policy and the EU s taxation policy and EU action in the fields of sport occupational health and safety and transport policy The author convincingly shows that conflicts of interest inherent in market forces demand a strong EU intervention preferably through legislation than self regulation She also demonstrates the urgent need to reach an agreement on the basis of reliable data about what is effective in practice to improve lifestyles The study acknowledges that the law is not a panacea but nonetheless has an influential role to play in making the healthy choice an easier choice and must move decisively towards ensuring that the societal costs associated with obesity are sustainable and that the ultimate goal of a healthy population is achievable The book is essential reading for everyone involved or interested in the development of the EU s obesity prevention policy
