One Health: The Well-being Impacts of Human-nature Relationships Eric Brymer, Elizabeth Louise Freeman, Miles Richardson, 2019-11-07 In recent years there has been a growing body of evidence from fields such as public health architecture ecology landscape forestry psychology sport science psychiatry geography suggesting that nature enhances psychological health and wellbeing. Physical activity in the presence of nature feelings of connection to nature engagement with nature specific environmental features e.g. therapeutic water and trees and images of real and virtual nature have all been posited as important wellbeing facilitators. Thus the association between natural environments and health outcomes might be more complex than initially understood. Pritchard Richardson Sheffield Karmanov Freeman Akhurst 2015 in the development of wellbeing and health outcomes. Furthermore traditional theoretical notions such as Biophilia topophilia restoration theories and stress reduction theories typically used to interpret findings are also being critiqued. Often one of the main barriers for practitioners is the vast array of theories that claim to effectively explain research findings but that tend to be only partially relevant e.g. for Physical activity or restoration focus on the characteristics of the person e.g. nature relatedness and only some features of the landscape e.g. therapeutic landscapes. This special edition therefore brings together cutting edge ideas and research from a wide set of disciplines with the purpose of exploring interdisciplinary or trans disciplinary approaches to understanding the psychological health and wellbeing benefits of human nature interactions.
