*Understanding SOA Security Design and Implementation* Axel Buecker, Paul Ashley, Martin Borrett, Ming Lu, Sridhar Muppidi, Neil Readshaw, IBM Redbooks, 2008-05-29 Securing access to information is important to any business Security becomes even more critical for implementations structured according to Service Oriented Architecture SOA principles due to loose coupling of services and applications and their possible operations across trust boundaries To enable a business so that its processes and applications are flexible you must start by expecting changes both to process and application logic as well as to the policies associated with them Merely securing the perimeter is not sufficient for a flexible on demand business In this IBM Redbooks publication security is factored into the SOA life cycle reflecting the fact that security is a business requirement and not just a technology attribute We discuss an SOA security model that captures the essence of security services and securing services These approaches to SOA security are discussed in the context of some

scenarios and observed patterns We also discuss a reference model to address the requirements patterns of deployment and usage and an approach to an integrated security management for SOA This book is a valuable resource to senior security officers architects and security administrators     *Regulating the Security Industry* Great Britain. National Audit Office,2008 The Security Industry Authority the body which licences security guards door supervisors and vehicle immobilisers has secured a high level of compliance by people working in the industry with the requirement to be licensed As at the end of May 2008 the Authority had issued over 248 000 licences and compliance is over 90 per cent Its efficiency has however been hampered by poor forecasting of licensing demand and costs and difficulties with the computerised systems procured to process licence applications When the Authority was created in 2003 the licence fee was set at 190 but it was costing the Authority 215 to process an application As a result the Authority needed an additional 17.4 million of public funding between 2004/05 and 2007/08 to carry out its work In the winter of 2005/06 the Authority's original system for producing licences was unable to cope with the large number of later than planned applications the Authority received In autumn 2007 the Authority's replacement system was not ready on time and a backlog of applications arose These two problems resulted in the Authority incurring additional costs of 1 million The Private Security Industry Act 2001 set up the Authority to regulate individuals but in a number of other countries the equivalent bodies also regulate businesses The NAO recommends that in addition to individuals all private security businesses should be registered with the Authority The SIA has already started a feasibility study to consider the compulsory registration of private security companies     **Intelligent Control and Automation** De-Shuang Huang,George William Irwin,2006-09-08 Results of the International Conference on Intelligent Computing ICIC 2006 Lecture Notes in Computer Science LNCS Lecture Notes in Artificial Intelligence LNAI Lecture Notes in Bioinformatics LNBI Lecture Notes in Control and Information Sciences LNCIS 142 revised full papers are organized in topical sections Blind Source Separation Intelligent Sensor Networks Intelligent Control and Automation and Data Fusion Knowledge Discovery and Data Mining Includes a Special Session on Smart and Intelligent Home Technology
