Geoffrey Bawa The Complete Works:

Geoffrey Bawa David G. Robson, Geoffrey Bawa, 2002 This is a definitive and comprehensive monograph on one of the 20th century's greatest architects Geoffrey Bawa whose influence has extended to garden and landscape design *Geoffrey Bawa - A Conscious Perception* Nivi Ann Monsy, 2015-04-20 This book is all about giving the readers a peek view into the life of Geoffrey Bawa Sri Lanka's most famous architect a book that reveals an insight into his work through his most famous projects accompanied by beautiful hand drawn illustrations Alluring and simply authentic these self narrative illustrations are a result of a personal experience This book will give readers an understanding of how successfully Geoffrey Bawa had inculcated spaces vistas and landscape with that of the built environment bringing about a touch of Modern Tropism and fusing it together with the rich culture and traditions of Sri Lanka *Cultural Encounters and Homoeroticism in Sri Lanka* Robert Aldrich, 2014-10-17 Ceylon or Sri Lanka was long known to travellers for its luxuriant landscapes colourful temples and friendly inhabitants the island once named Serendip This book explores the sojourns of gay visitors from the late 1800s to the modern day providing a history of homosexuality travel and cultural encounter on the island The book offers profiles of major figures in Sri Lankan culture and of homosexual visitors both famous and infamous to the island It discusses the experiences of sojourners including the Victorian social reformer Edward Carpenter and the German naturalist Ernst Haeckel such British and American writers as Paul Bowles and Arthur C Clarke and the Australian painter Donald Friend It also pays particular attention to Lionel Wendt one of the most important modernist photographers outside Europe For these figures an erotic appreciation of young men whom they encountered mixed with interest in Sinhalese art Buddhist and Hindu spirituality and the flora and fauna of the island Their experiences influenced modern writing art and dance Cultural influences moved in both directions however and Sri Lankans also found inspiration from abroad The book argues that homosexuals played a major role in the transmission of cultural influences from Sri Lanka to the rest of the world and from the wider world to this Indian Ocean island Providing an original analysis of gay cultures in Sri Lanka from Victorian encounters to the present day this book is the first study of Sri Lanka as a site of gay travel An excellent study of trans national cultural exchange sexuality and the relationships between them it will be of interest to academics in the field of Asian Studies Colonial History and Gay and Queer Studies **Region** Simon Richards, Robert Schmidt III, Cagri Sanliturk, Falli Palaiologou, 2023-07-28 This book explores how the concept of region has evolved over time and shaped architectural culture and practice It questions what the words region and regional mean for architecture cities and landscapes past and present and speculates on the forms they might take in the future Region is explored in many thematic guises as a real geographical site of evolving socio economic activity as a mythical locus of enduring value as a gatekeeper of indigenous crafts and vernacular techniques as a site of architectural and artistic imagination as a repository of contested conflicted and mobile identities The contributing chapters take these themes from the theoretical and literary page through

to architectural and urban practice and from the scale of the domestic hearth through to the ocean archipelago and international law enriching the long standing trope of viewing architectural regionalism purely as a matter of style Curated into four key thematic areas Theorised Regions Contested Regions Heritage Regions and Future Regions the book incorporates the values concerns and approaches of a truly diverse international community of scholars curators and practitioners as well as the design work of international students tasked to explore what region means to them

Architecture, Power and National Identity Lawrence Vale, 2014-05-01 The first edition of *Architecture Power and National Identity* published in 1992 has become a classic winning the prestigious Spiro Kostof award for the best book in architecture and urbanism Lawrence Vale fully has fully updated the book which focuses on the relationship between the design of national capitals across the world and the formation of national identity in modernity Tied to this it explains the role that architecture and planning play in the forceful assertion of state power The book is truly international in scope looking at capital cities in the United States India Brazil Sri Lanka Kuwait Bangladesh and Papua New Guinea *Architecture and Identity* Peter Herrle, Erik Wegerhoff, 2008 This book brings together complex fields of knowledge and globally splintered discourses on a subject that is experienced not only by scholars but in the everyday lives of people around the world There is a common complaint about the loss of identity which to a substantial degree is being associated with the built environment in cities and specifically with their architecture *Architecture and Identity* takes a global multidisciplinary look on how identities in contemporary architecture are constructed The general hypothesis underlying this book is that in a globalized world identity in architecture cannot be easily derived from distinct indigenous patterns The book presents forty contributions from various disciplines aiming to destroy the myth of an inheritable or otherwise prefabricated identity Some authors dismantle constructs of identity that have long been considered as solid and unbreakable while others meticulously unravel the construction process of identities in *Encyclopedia of Twentieth Century Architecture* R. Stephen Sennott, 2004 A balance of sophistication and clarity in the writing authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world's most notable architecture The contents feature major architects firms and professional issues buildings styles and sites the architecture of cities and countries critics and historians construction materials and planning topics schools movements and stylistic and theoretical terms Entries include well selected bibliographies and illustrations Reference that rocks American Libraries May 2005 **The Environmental Brief** Richard Hyde, Steve Watson, York St John Business School Steve Watson, Wendy Cheshire, Mark Thomson, 2007-01-24 The built environment is responsible for an estimated forty five per cent of all greenhouse gas emissions As the greatest opportunities for reducing these emissions occur during the briefing and design processes the pathway to better design lies in preparing environmental briefs and using these to drive building design and produce buildings of high environmental performance This process driven book looks at the theoretical

issues involved in an environmental brief and outlines methods by which architects can approach the writing of a brief that considers all aspects of the natural and the built environment and relates these concepts to a number of case studies from around the world *The City in South Asia* James Heitzman,2008-03-31 With case studies in each chapter focusing on specific cities and including maps and photographs this book is a comprehensive survey of urbanization in South Asia during the last 5000 years **Colonial Modernities** Peter Scriver,Vikramaditya Prakash,2007-03-12 A carefully crafted selection of essays from international experts this book explores the effect of colonial architecture and space on the societies involved both the colonizer and the colonized Focusing on British India and Ceylon the essays explore the discursive tensions between the various different scales and dimensions of such empire building practices and constructions Providing a thorough exploration of these tensions Colonial Modernities challenges the traditional literature on the architecture and infrastructure of the former European empires not least that of the British Indian Raj Illustrated with seventy five halftone images it is a fascinating and thoroughly grounded exposition of the societal impact of colonial architecture and engineering
