was struck by the idea of a small or big event that could shift our perception about time and how this could lead to significant changes into someone's life. The next morning instead of going to sleep as I should have done I lit up a cigarette and started typing and I didn't finish until the first chapter was done. This book is divided into two parts. In the first part I'm telling you the story of Colt who faces a big event that makes him lose his perception about time. Something happens with him and that something nearly costs him his life. You'll have to find out what. Then in the second part you'll find out the aftermath of the event from the first part. The book is also about love, adventure, friendship and trust. And the most important thing: living life guided by one single phrase: *Le vent nous portera*. Autocar, 2005

Knowledge Integration and Innovation Christian Berggren, Anna Bergek, Lars Bengtsson, Michael Hobday, Jonas Söderlund, 2011-08-11. Technology-based firms continue to compete primarily on innovation and are continuously required to present new solutions to an exacting market. As technological complexity and specialization intensifies, firms increasingly need to integrate and coordinate knowledge by means of project groups, diversified organizations, inter-organizational partnerships and strategic alliances. Innovation processes have progressively become interdisciplinary, collaborative, inter-organizational and international, and a firm's ability to synthesize knowledge across disciplines, organizations and geographical locations has a major influence on its viability and success. This book demonstrates how knowledge integration is crucial in facilitating innovation within modern firms. This book provides original, detailed empirical studies of prerequisites, mechanisms and outcomes of knowledge integration processes on several organizational levels, from key individuals, projects and internal organizations to collaboration between firms. It stresses the need to understand knowledge integration as a multi-level phenomenon which requires a broad repertoire of organizational and technical means. It further clarifies the need for strong internal capabilities for exploiting external knowledge, reveals how costs of knowledge integration affect outcomes and strategic decisions, and discusses the managerial implications of fostering knowledge integration, providing practical guidance and support for managers of knowledge integration in high technology enterprises.
