**Teens Choosing to Read** Gay Ivey, Peter Johnston, 2023 In a sea of troubling reporting about education teaching reading and the wellbeing of teens Ivey and Johnston bring some good news that shows what happens when we stop underestimating young people This accessible book offers an engaging account of a 4 year study of adolescents who went from reluctant to enthusiastic readers These youth reported that reading not only helped them manage their stress but also helped them negotiate happier more meaningful lives This amazing transformation occurred when their teachers simply allowed them to select their own books invited them to read with no strings attached and provided time for them to do so These students nearly all of whom reported a previously negative relationship with reading began to read voraciously inside and outside of school performed better on state tests and transformed their personal relational emotional and moral lives in the process This illuminating book leads readers on a tour of adolescents reading lives in their own words offering a long overdue analysis of students deep engagement with literature The text also includes research to inform arguments about what students should and should not read and the consequences of limiting students access to the books that interest them through censorship Book Features Links young adults reading engagement with socio emotional and intellectual development Provides nuanced descriptions of teaching practices that facilitate student agency in learning Features student voices that have been absent in debates about what is appropriate for young people to read and under what circumstances Connects student perspectives on reading with positive outcomes of reading to research from other disciplines Illuminates the breadth and depth of the responsibilities of teaching English language arts

Coleman,1966 Creating Literacy-Rich Schools for Adolescents Gay Ivey,Douglas Fisher,2006-03-15 We know that literacy is the key to learning in school yet millions of middle and high school students lack the literacy skills they need to succeed What can educators do In *Creating Literacy Rich Schools for Adolescents* authors Gay Ivey and Douglas Fisher make a compelling case that all teachers across the content areas have a role to play in students development of literacy which they define as reading writing speaking listening and viewing Rather than focusing solely on reading instruction and the cliché that says all teachers are teachers of reading they urge teachers to incorporate rich literacy based learning experiences into their classrooms with the goal of helping students to learn and think across the curriculum With research based findings engaging examples and extensive lists of resources Ivey and Fisher encourage readers to Reexamine the materials experiences and expectations of the English language arts classroom Use strategies to improve literacy in all the content areas and seek alternatives to the traditional textbook Make independent reading an important part of students ongoing literacy development Design and use interventions that really work for struggling students and Consider the schoolwide elements professional development peer coaching leadership and assessment that should be in place to support teachers and students Essential questions provide the focus for each chapter and Quality Indicators for Secondary Literacy help readers gauge where they are on the continuum of providing a meaningful literacy experience for students *Creating Literacy Rich Schools for Adolescents* will inspire educators to take up this challenge in their own school with new confidence that the work is worthwhile and achievable Note This product listing is for the Adobe Acrobat PDF version of the book Campaign Finance Complexity Mary Jo McGowan Shepherd,2018-02-07 The campaign finance system regulates campaign contributions and behavior with the intent to eliminate corruption or the potential for corruption in elections With that goal in mind state legislators created statutes regulating campaign behavior Each state has wide variation in the complexity of campaign finance regulations Regulatory systems create a network of rules

and regulations and campaign finance is no different. The difference is in the behavior regulated and the potential negative impacts of a complex regulatory system. Candidates running for office must take time and effort to learn and comply with campaign finance regulations to compete in an election. If campaign finance regulations are complex, the time and effort required to learn and comply increases and has the potential to take candidates away from campaigning. This book studies whether states with complex regulations have fewer candidates running for office or more candidates withdrawing their candidacy after starting a campaign. This potentially negative consequence of campaign regulations impacts participation rates for individuals running for office. In a democracy, we desire more candidates in order to maintain a diverse candidate pool, but a complex regulatory system may adversely affect that goal by increasing candidate costs.
