

This plane doesn't need very much dihedral. Be sure that the fuselage isn't twisted when you glue on the wings.

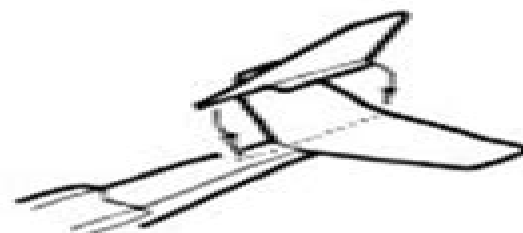

- 6** Fold nose part 10 and spread glue over the inner surface of the sides. Slide it over the nose and push it all the way back to the glue tabs for the wing.

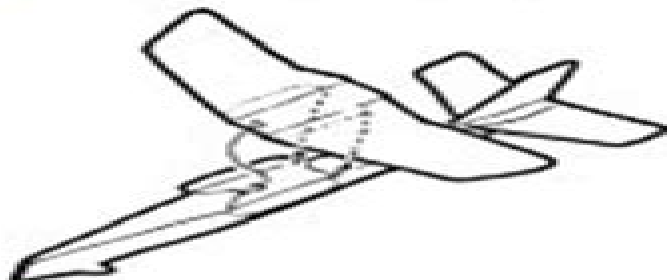

- 7** Fasten it firmly to the sides of the fuselage. Glue together the two halves of the hook as well.

- 8** Glue stabilizer 11 to the tabs at the rear of the fuselage. Make sure it is straight.

- 9** Glue the rudder to the center of the stabilizer and the top of the fuselage. Take care to get it straight.

- 10** Glue the wing to the top of the fuselage. The front edge is tucked and glued under the triangular tab at the back of part 10. The rear edge floats a bit at the back.

- 11** Add a bit of camber (front to back arching) to the wings, let it dry a bit, and you are ready for test flights.
