children **International Perspectives on Early Childhood Education and Care** Jan Georgeson, Jane Payler, 2013-02-16

There is a growing interest in understanding how early years care and education is organised and experienced internationally. This book examines key influential approaches to early years care as well as some less well known systems from around the world. In particular, the book aims to inform those studying early years about perspectives in other countries, encourage critical thinking about issues, influences and the complexities of early years provision around the world, promote critical reflection on students' own provision and the current context of that provision. Each chapter provides an overview of early years provision and explores historical and current influences in context as well as offering insights into daily life through short vignettes, longer case studies and commentary from practitioners. Whilst many approaches such as Reggio Emilia, Te Whāriki and Head Start are widely admired, it is important for reflective practitioners to understand the motivation which gave rise to these influential approaches in their original context. Additionally, broadening understanding through information on less widely known systems, the book provides students with a good grounding in the international context of early years, the provenance of different early years approaches and principles and the influences on their own countries' provision. Written in a straightforward and accessible style, the book is designed to meet the needs of students studying modules related to international perspectives on a range of foundation, bachelor and master's degrees in early years.
