## **Highest Ranking Journals Impact Factor:**

**Multidimensional Journal Evaluation** Stefanie Haustein, 2012-04-26 Scientific communication depends primarily on publishing in journals. The most important indicator to determine the influence of a journal is the Impact Factor. Since this factor only measures the average number of citations per article in a certain time window, it can be argued that it does not reflect the actual value of a periodical. This book defines five dimensions which build a framework for a multidimensional method of journal evaluation. The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011.

*Journals of the Century* Tony Stankus, 2019-12-06 This book first published in 2002 gathers some of America's top subject expert librarians to determine the most influential journals in their respective fields. 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of their individual specialties worldwide. Their choices reflect the history of each discipline or profession, taking into account rivalries between universities, professional societies for profit and not for profit publishers, and even nation states and international ideologies in each journal's quest for reputational dominance. Each journal was judged using criteria such as longevity of publication, foresight in carving out its niche, ability to attract none are in the employ of any publisher but each is fully credentialed and well published, and many are award winners. The authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty students and working professional clientele.

**How to Get Published in the Best Tourism Journals** Chris Cooper, C. M. Hall, 2024-04-12 Drawing on a wealth of knowledge and experience from leading tourism academics and journal editors, this practical *How To* guide offers clear, sighted advice on how to craft a high quality paper in terms of contribution, positioning, and submission. Accessible and comprehensive, it demystifies the process of getting published in the top tourism journals.

*Demystifying Scholarly Metrics* Marc W. Vinyard, Jaimie Beth Colvin, 2022-02-25 *Demystifying Scholarly Metrics* gives librarians and faculty the confidence to navigate the maze of scholarly metrics, identify quality journals in which to publish, and measure the impact of scholarly works. Both librarians and professors can be overwhelmed by the bewildering number of scholarly metrics. This user-friendly book demystifies them, helping librarians become familiar with scholarly metrics and giving them the confidence to assist faculty at their institutions. It also equips faculty authors with the knowledge to evaluate journals and use metrics to track their scholarly impact. Several controversies exist in the scholarly metrics landscape, including a disagreement between the proponents of altmetrics and traditional bibliometrics. Even more contentious debates are breaking out over predatory journals and open access publishing. Authors Mark Vinyard and Jaimie Beth Colvin, who successfully launched a faculty publishing initiative, explain which aspects of metrics are truly essential to grasp and they place these numbers in context. They help readers identify the metrics that are the best fit for their scholarship and give librarians and professors the tools to make smart decisions in this changing scholarly metrics landscape. *Research*

*Methods* Ben Gorvine, Karl Rosengren, Lisa Stein, Kevin Biolsi, 2018 Research Methods From Theory to Practice guides students through the entire research process from choosing a research question and getting Institutional Review Board approval to presenting results at conferences and submitting work for peer review KEY FEATURES Provides students the practical skills needed to conduct their own research Encourages critical thinking to help students become educated consumers of research presented in journal articles and the popular media Considers the influence of rapidly changing technology on research methods including statistical and neuroscience methods Inside Research features personalize research by highlighting real life examples of researchers working in a variety of fields Media Matters features analyze and evaluate how a particular research study or general topic relevant to the chapter is portrayed in the media Flowchart Figures present key concepts of the research process in a clear and simple visual overview Doing a Master's Dissertation in TESOL and Applied Linguistics Lindy Woodrow, 2019-10-11 Doing a Master's Dissertation in TESOL and Applied Linguistics is a practical guide for master's students tackling research and research writing for the first time Structured for use in class or as part of an independent study and divided into the four stages of designing researching writing up and submitting a dissertation this book carefully guides readers from the very beginning of producing a research proposal all the way through to assessment procedures and the provisions for resubmission covers publishing your dissertation and applying for higher research degrees including funding addresses all the most fundamental concerns students have about master's dissertations including how to choose a topic and conducting a literature review draws upon examples from master's dissertations from the UK US and Australia and provides numerous how to tables and checklists and includes activities and resources to facilitate master's research and dissertation writing as well as FAQs and solutions at the end of each chapter Tailormade for MA students in TESOL or Applied Linguistics this book is essential reading for students on these degrees around the world as well as for their supervisors and programme directors *The Rise of the Scientist-Bureaucrat* Jose Luis Perez Velazquez, 2019-03-13 Perez Velazquez has written a little gem that I advise reading to anyone pursuing a scientific career as well as for the general public interested in the sociological aspects of science It alerts the reader about the rise of a new type of scientist buried in bureaucracy and financial issues In contrast to past generations this new scientist is sadly left with minimal time to dedicate to creative work It studies the consequences of this state of affairs the problems associated with peer reviewing the dilemma of funding innovative research the nature of corporate academic culture and the trivialization of scientific achievement by grant agencies and universities It also provides possible solutions for these problems All this is magnificently exemplified and documented including personal experiences from the author and a touch of humor illustrated in the accompanying cartoons Despite the humor it is a serious piece of work that would also be useful for the conscientious academic worried about the difficulties of the current research scene Marina Frantseva MD PhD Jose Luis Perez Velazquez is a Spanish biochemist biophysicist He has a degree in Biochemistry and a PhD in Molecular Physiology Biophysics His

research activities are mainly in the fields of the brain behaviour relation at a high level of description seeking principles of biological organisation He worked as a senior scientist at the Hospital for Sick Children in Toronto and was Professor at the University of Toronto where he taught a graduate course on consciousness and self awareness which derived in part from his book *The Brain Behaviour Continuum* World Scientific He also edited the book *Coordinated Activity in the Brain* Springer and edited special issues for *The Journal of Biological Physics* *Frontiers in Integrative Neuroscience* and *Frontiers in Computational Neuroscience* Currently he is a Research Scholar at the Ronin Institute where he continues to investigate a possible global principle a scheme that combines theoretical studies and experimental observations aimed at conceptualizing how consciousness arises from the organization of matter

**The Death of a Scientist** Alexander Vapirev, 2018-09-24 A contemporary and detailed look at the reality behind the PhD degrees and postdoctoral fellowships in academia The book explores some of the most pressing issues and unique challenges currently facing the doctoral and postdoctoral programs both on a local institutional level and on a global one where multiple complex factors influencing and governing the academic environment take place The interrelated nature of these challenges together with discussions over certain historical trends and demographics offer a unique perspective on some often overlooked topics such as academic advisors and mentoring increasing job insecurity career prospects mental issues discrimination and women in science ever growing need for funding increasing pressure for high profile research internationalization of science trends in university management higher education dynamics and government policies backed with references to published research national and international surveys and census data Today most of the PhD programs have been accommodated to the benefit of the university with disregard to any sustainable demand and supply job market strategies contrary to the original ideas behind their inception The result is an over flooded job market and huge underemployment rates among doctorate holders Infused with a narrative of a rich mix of personal experiences observations and impressions all dressed in humor mostly dark sarcasm irony disbelief and often outright criticism this text does not shy away from asking uncomfortable questions and even attempts to provide answers to some of them At the same time it also offers practical advice for those considering and those who already have dared to tread the PhD path

**Towards Industry 5.0** Numan M. Durakbasa, M. Güneş Gençyılmaz, 2023-03-01 This book contains selected papers from International Symposium for Production Research 2022 held on October 6 9 2022 Turkey The book reports recent advances in production engineering and operations It explores topics including production research production management operations management industry 4 0 industrial engineering mechanical engineering engineering management and operational research Presenting real life applications case studies and mathematical models this book is of interest to researchers academics and practitioners in the field of production and operation engineering It provides both the results of recent research and practical solutions to real world problems

**Getting A Phd** John A. Finn, 2005 This highly practical book provides a workable action plan to help students get a PhD Illustrated throughout with examples from a wide

range of academic disciplines the book includes exercises and points for reflection as well as info on research      **Annual Review of Comparative and International Education 2018** Alexander W.
