Listening to and Learning from Students Brian D.

Schultz,2011-01-01 This book embraces the idea of listening to and learning from students Although many educational theorists have long argued that incorporating children s perspectives about teaching and curriculum has the potential for increasing students interest and participation in learning their radical perspectives are still ignored or dismissed in theory and practice Through featured essays historical excerpts and provocative poetry this collection provides research literature and inquiry ideas that ought to be part of educational debates policy discussions and decision makings Articulated through thoughtful prose and discerning analysis youth teachers and scholars featured in this collection illuminate the power and promise of not only listening to and learning from students but also acting upon the insights of students This book calls for the 21st century educational workers teachers educators parents community workers administrators and policy makers to perceive students as massive reservoirs of knowledge that invigorate possibilities for teaching learning and curriculum in the contested educational landscape The Lowdown on China's Higher Education Martin Wolff,2011-07-12

Obviously you are not chanting the exultations of China which many of my country people are used to listening to A Chinese scholar recognizes that this book is not a further attempt to curry favor with China by tickling its leaders ears This book examines what is right and the truth about what is wrong with English language education in Chinese colleges and universities As our Chinese colleague further states Most Chinese are learning English like one learning swimming ashore We have been writing about these shortcomings for ten years It arises because administrators posted to their positions due to party affiliation and good standing are basically ignorant of administration and educational matters The VIPs of EEC believe that they know while they don t what are under their supervision the professionals of EEC believe that what they are doing academically is helpful while it s not The two types are making the common non professional people believe that they are knowingly reliable while they are not The educated as well as the illiterate do not know what to do and what not to do what is correct and what is wrong what is worthy and what is not etc The weakness from the historical perspective is also a consequence of modern Chinese history whose knowledge most Chinese people are poor at but reluctant to admit This book could not be published within China due to its truthfulness *Global War Crimes Tribunal Collection: The Rwanda Tribunal* ,2007 **American**
