

Home brew 50 amp to 30 & 20 amp breakout box. The breakout box sets under one of the slideouts out of the weather next to the Marinco power inlet port on the TT. A separate 20 amp extension cord runs from the front of the camper where it is plugged into a 120 volt line coming from the bedroom rooftop AC unit. This allow us to run the bedroom air from a generator in the back of the truck any time we're not hooked to shower power. This power cord allow us to hook up to any 50 amp plug available and still run the second air conditioner even though we only have a 30 amp service in the TT. I used an existing cable I had in the scrap pile. The max draw is 20 amps on the **RED** leg and 30 amps on the **BLACK** leg. Of course you do need to observe proper polarity when wiring the plug and sockets. **"Note"** I will be adding a 20 & 30 amp breaker inside the breakout box to protect the cable. 50 amps is available below the max current and no

complaints from the park owner.

50 amp plug wired to 30 amp mult wire cable.

50 foot cable

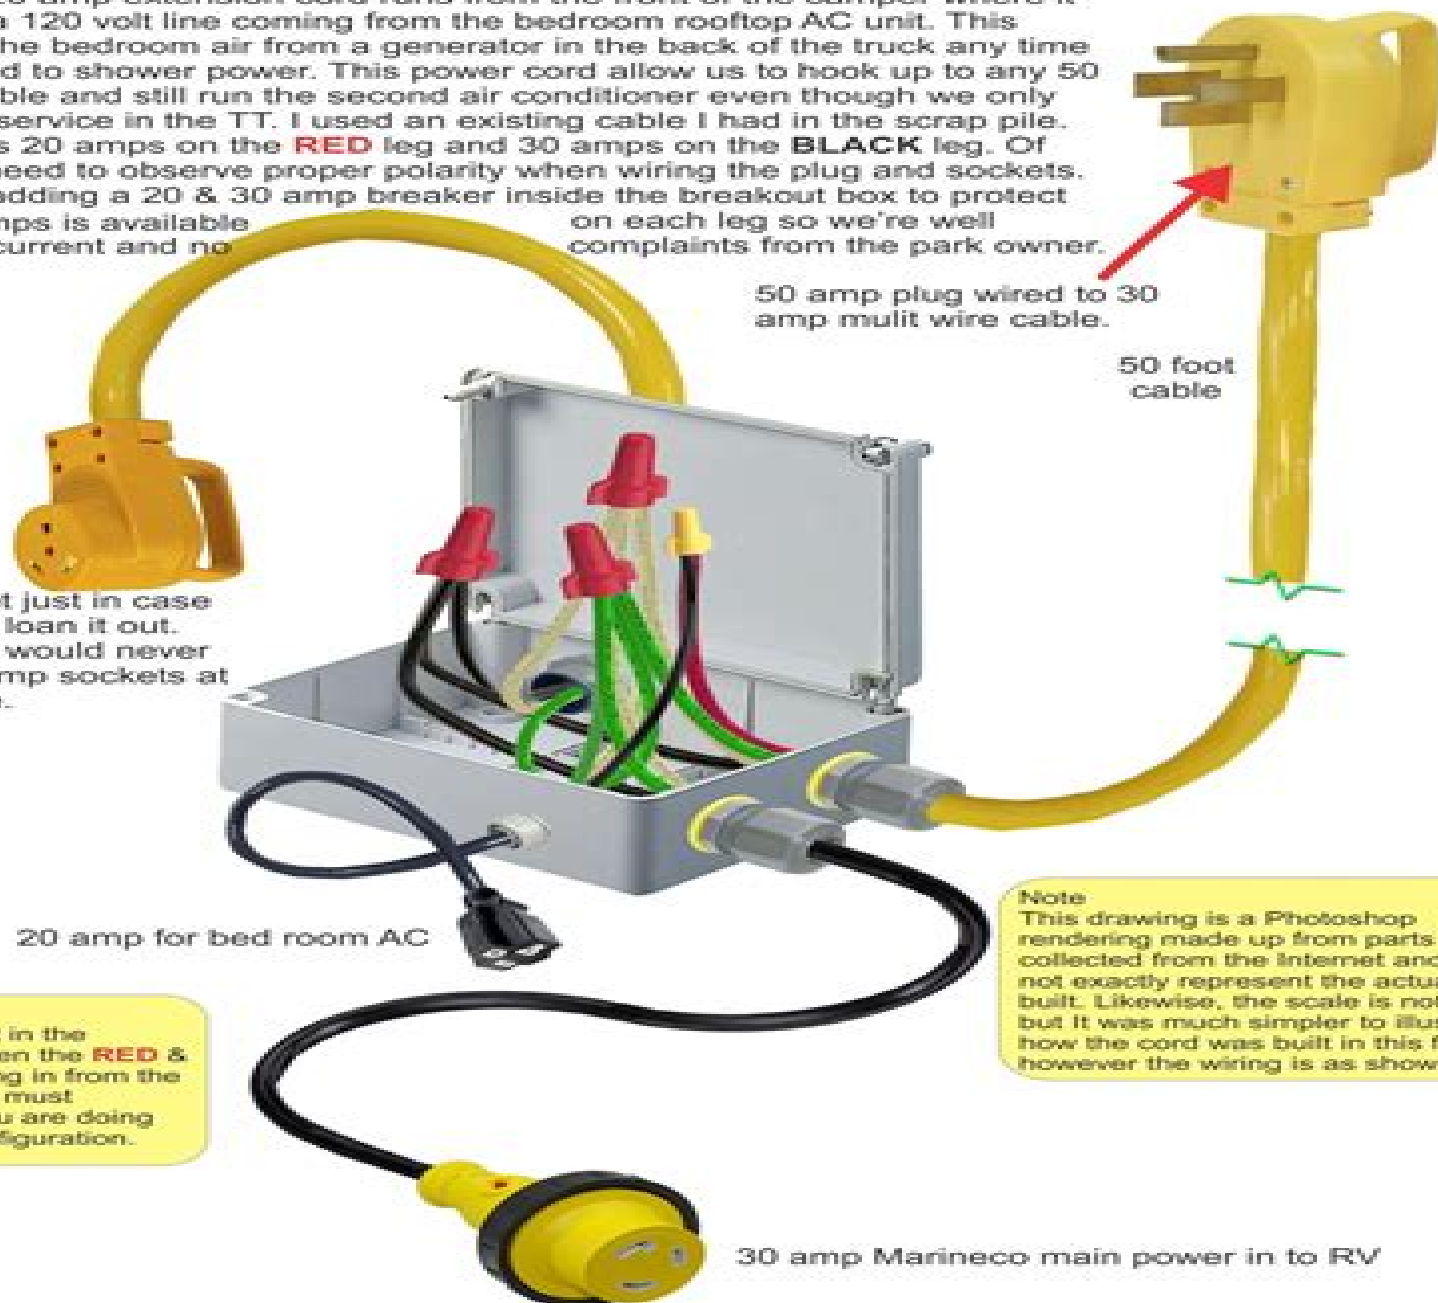

30 amp socket just in case I may need to loan it out.
"Caution" You would never use both 30 amp sockets at the same time.

20 amp for bed room AC

Note
240 volts is present in the breakout box between the **RED** & **BLACK** wires coming in from the 50 amp plug so you must understand what you are doing when using this configuration.

Note
This drawing is a Photoshop rendering made up from parts collected from the Internet and does not exactly represent the actual unit I built. Likewise, the scale is not perfect but it was much simpler to illustrate how the cord was built in this fashion, however the wiring is as shown.
