  - b. Adult
    - i. skin, liver, bone marrow, and muscles
    - ii. Precursor cells have the ability to form many different types of cells, but they cannot produce more stem cells
    - iii. rare and more difficult to detect and isolate
- III. Previously has been a controversial issue:
  - a. For
    - i. Scientists and researchers see almost infinite value in the use of embryonic stem cell research to understand human development and the growth and treatment of diseases
  - b. Against
    - i. Staunch pro-lifers and most pro-life organizations regard the destruction of the blastocyst, which is a laboratory-fertilized human egg, to be the murder of human life
