Building News Literacy Tom Bober, 2021-01-05 Every upper elementary and middle school educator can teach news literacy and connected literacies including text, visual, graphic and video literacy using this book. This book suggests that news literacy is made up of several other literacies and skills that must not only be explored across the subject areas but also connected to students' real world consuming and sharing habits. A series of lessons, some using technology, lay a foundation for building these multiple literacies and skills. While not meant to be a complete program, the lessons provide a holistic experience and are adaptable to personalize students' learning. The author melds strategies for finding and making meaning from information, the multiple literacies that young consumers of news must be familiar with to navigate news and other information, and the digital skills necessary to navigate today's news options. Whether students encounter news in the firewall-protected classroom or pushed out to them on their phones, the series of lessons encourage them to give pause and ask important questions as they move beyond simply consuming to become critical readers of the news.

Ethics for a Digital Era Deni Elliott, Edward H. Spence, 2017-11-29 Elliott and Spence have produced a tight, teachable and timely primer on media ethics for users and creators of information in the digital age. Pitched at just the right depth of detail to provide a big picture contextualization of changing media practices grounded in concerns for democracy and the public good, the book explores and reflects the implications of the convergence of the Fourth and Fifth Estates with an open access, hyper-linked architecture which invites self-reflective practice on the part of its users. Philip Gordon, Utah Valley University, 2019 PROSE Award Finalist in the Media Cultural Studies category. The rapid and ongoing evolution of digital technologies has transformed the way the world communicates and digests information. Fueled by a 24-hour news cycle and post-truth politics, media consumption and the technologies that drive it have become more influential in shaping public opinion, and it has become more imperative than ever to examine their social and ethical consequences. *Ethics for a Digital Era* provides a penetrating analysis of the ethical issues that have emerged as the digital revolution progresses, including journalistic practices that impact on the truth, reliability and trustworthiness of communicating information. The volume explores new methods and models for ethical inquiry in a digital world and maps out guidelines for web-based news producers and users to conceptualize ethical issues and analyze ethically questionable acts. In each of three thematic sections, Deni Elliott and Edward H. Spence reflect upon shifts in media ethics as contemporary mass communication combines traditional analog practices with new forms like blogs, vlogs, podcasts and social media posts and evolves into an interactive medium with users who both produce and consume the news. Later chapters apply a process of normative decision making to

some of the most important issues which arise in these interactions and encourage users to bridge their own thinking between the virtual and physical worlds of information and its communication Timely and thought provoking Ethics for a Digital Era is an invaluable resource for undergraduate and graduate students in media and mass communication applied ethics and journalism as well as general readers interested in the ethical impact of their media consumption
