pedestrians already have a functioning system of understating each other while on the move Adding automated vehicles to the mix requires assessing the spectrum of existing modes of communication both implicit and explicit biological and technological and how they will interact with each other in the real world. The impending deployment of AVs represents a major shift in the traditional approach to ground transportation its effects will inevitably be felt by parties directly involved with the vehicle manufacturing and use and those that play roles in the mobility ecosystem e g aftermarket and maintenance industries infrastructure and planning organizations automotive insurance providers marketers telecommunication companies Unsettled Issues Regarding Communication of Automated Vehicles with Other Road Users brings together the multiple scenarios we are likely to see in a future not too far away and how they are likely to play out in practical ways Click here to access the full SAE EDGETM Research Report portfolio https doi org 10 4271 EPR2020023 Communications, Networks, and Systems Xiaochun Cheng, 2025-02-06 This two volume set LNICST 601 and LNICST 602 constitutes the refereed post conference proceedings of the 14th International Conference on Broadband Communications Networks and Systems BROADNETS 2024 held in Hyderabad India in February 16 17 2024 The 49 full papers presented here were carefully reviewed and selected from 122 submissions.
