Energy Use Efficiency Almas Heshmati, 2021-04-14 Energy is one of the most important factors of production Its efficient use is crucial for ensuring production and environmental quality Unlike normal goods with supply management energy is demand managed Efficient energy use or energy efficiency aims to reduce the amount of energy required to provide products and services Energy use efficiency can be achieved in situations such as housing offices industrial production transport and agriculture as well as in public lighting and services The use of energy can be reduced by using technology that is energy saving This Special Issue is a collection of research on energy use efficiency *Plug-In Electric Vehicles* David B. Sandalow, 2009-09-01 Plug in electric vehicles are coming Major automakers plan to commercialize their first models soon while Israel and Denmark have ambitious plans to electrify large portions of their vehicle fleets No technology has greater potential to end the United States crippling dependence on oil which leaves the nation vulnerable to price shocks supply disruptions environmental degradation and national security threats including terrorism What does the future hold for this critical technology and what should the U S government do to promote it Hybrid vehicles now number more than one million on America's roads and they are in high demand from consumers The next major technological step is the plug in electric vehicle It combines an internal combustion engine and electric motor just as hybrids do But unlike their precursors PEVs can be recharged from standard electric outlets meaning the vehicles would no longer be dependent on oil Widespread growth in the use of PEVs would dramatically reduce oil dependence cut driving costs and reduce pollution from vehicles National security would be enhanced as reduced oil dependence decreases the leverage and resources of petroleum exporters Brookings fellow David Sandalow heads up an authoritative team of experts including former government officials private sector analysts academic experts and nongovernmental advocates Together they explain the current landscape for PEVs the technology the economics and the implications for national security and the environment They examine how the national interest could be served by federal promotion and investment in PEVs For example can tax or procurement policy

advance the cause of PEVs Should the public sector contribute to greater research and development Should the government insist on PEVs to replenish its huge fleet of official vehicles Plug in electric vehicles are coming But how soon in what numbers and to what effect Feder
