Forest Value Chain

Optimization and Sustainability Sophie D'Amours,Mustapha Ouhimmou,Jean-François Audy,Yan Feng,2016-12-01 This book provides a global perspective on the various issues that the industry has to face as well as to provide some key global strategies that can help coping with those global challenges such as collaboration strategic value chain planning and

interdependency analyses It presents literature reviews strategic research orientations assessment of some current key issues and state of the art methodologies Treatise on Water Science ,2010-09-01 Water quality and management are of great significance globally as the demand for clean potable water far exceeds the availability Water science research brings together the natural and applied sciences engineering chemistry law and policy and economics and the Treatise on Water Science seeks to unite these areas through contributions from a global team of author experts The 4 volume set examines topics in depth with an emphasis on innovative research and technologies for those working in applied areas Published in partnership with and endorsed by the International Water Association IWA demonstrating the authority of the content Editor in Chief Peter Wilderer a Stockholm Water Prize recipient has assembled a world class team of volume editors and contributing authors Topics related to water resource management water quality and supply and handling of wastewater are treated in depth *Integrated Environmental Modelling to Solve Real World Problems* A.T. Riddick,H. Kessler,J.R.A. Giles,2017-01-10 The discipline of Integrated Environmental Modelling IEM has developed in order to solve complex environmental problems for example understanding the impacts of climate change on the physical environment IEM provides methods to fuse or link models together this in turn requires facilities to make models discoverable and also to make the outputs of modelling easily visualized The vision and challenges for IEM going forward are summarized by leading proponents Several case studies describe the application of model fusion to a range of real world problems including integrating groundwater and recharge models within the UK Environment Agency and the development of catastrophe models to predict better the impact of natural hazards Communicating modelling results to end users who are often not specialist modellers is also an emerging area of research addressed within the volume Also included are papers that highlight current developments of the technology platforms underpinning model fusion *Green Industrial Policy in Emerging Countries* Anna Pegels,2014-03-05 For decades governments have tried to foster industrial competitiveness and economic growth Many instruments are known to work and many lessons have been learned However humanity is increasingly feeling the effects of natural resource depletion The rate of this depletion is deeply unsustainable and it is as of yet inextricably linked to economic growth and development To preserve acceptable living conditions for future generations while at the same time creating these conditions for millions of poor in the first place we must achieve a de linking of economic activity and resource depletion This book identifies the drivers and success factors of green industrial policy which seeks to reconcile the synergies and trade offs which exist between economic and environmental goals Greening the economy is a goal which will require enormous investment As markets are currently failing to provide the required incentives for environmental sustainability governments must intervene and provide policy rents for investments in sustainability while withdrawing rents from polluting investments In this they will face the risk of political capture by interest groups and difficult choices among technologies Rent management is therefore the heart of green industrial policy and the focus of this book On top of this the

country examples provided in this volume focus on the emerging powers which will have an important influence the future of our planet However the lessons learned are valuable not only for countries introducing green industrial policies for the first time but also for those under pressure to reform existing policies This book will be of interest to students researchers and policymakers in the areas of energy policy sustainable development industrial economics and ecological economics
