WHAT IS INTERNATIONAL ACCOUNTING?

Most accounting students are familiar with financial accounting and managerial accounting, but many have only a vague idea of what international accounting is. Defined broadly, the *accounting* in international accounting encompasses the functional areas of financial accounting, managerial accounting, auditing, taxation, and accounting information systems.

The word *international* in international accounting can be defined at three different levels.¹ The first level is supranational accounting, which denotes standards, guidelines, and rules of accounting, auditing, and taxation issued by supranational organizations. Such organizations include the United Nations, the Organization for Economic Cooperation and Development, and the International Federation of Accountants.

¹ This framework for defining international accounting was developed by Professor Konrad Kubin in the preface to *International Accounting Bibliography 1982-1994*, distributed by the International Accounting Section of the American Accounting Association (Sarasota, FL: AAA, 1997).
