management may lead to adaptations within the UN system or information which will neutralize ill founded criticism An improved understanding of the internal functioning of UN organizations may enhance their efficiency and impact Moreover sometimes member states have such high expectations that the UN system cannot live up to them In this way UN members regulate their own disappointments with the UN system A critical assessment of the limitations under which the UN organizations operate may prevent some of these high hopes and thus forestall some member state dissatisfaction This study deals in particular with the United Nations Populations Fund UNFPA and the United Nations Children s Fund UNICEF and their coordinated behaviour in the Joint Consultative Group on Policy JCGP This work will interest and be useful for managers in multilateral organizations and academics studying the functioning of these organizations
