Experiential Marketing Shaz Smilansky,2009-02-03 Consumers are constantly inundated with repetitive traditional advertising messages bombarding their lives interrupting their TV shows and generally getting in the way The consumer does not feel any real emotional connection with these brands and if they do buy it is simply because the brand that shouted the loudest got their attention This outdated approach to marketing communications is dying and fast Brands are realising that to secure the lifetime value of their customers by gaining true customer loyalty they must give something back The relationships between brands and their target audiences are being revolutionized Experiential Marketing looks at the new experiential marketing era which focuses on giving target audiences a fabulous brand relevant customer experience that adds value to their lives Experiential marketing is made up of live brand experiences two way communications between consumers and brands which are designed to bring brand personalities to life This book demonstrates how experiential

marketing fits in with the current marketing climate and how to go about planning activating and evaluating it for best results This is essential reading for both advertising and marketing practitioners and marketing students Digital Native , **HWM** ,2008-01 Singapore s leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews **HWM** ,2007-12 Singapore s leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews **HWM** ,2008-02 Singapore s leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews *Implementing Mobile TV* Amitabh Kumar,2012-11-12 Implement state of the art Mobile TV networks with this comprehensive guide to the latest technologies and standards including MediaFLO ATSC Mobile DTV and CMMB the same technologies seeing large scale rollouts today around the world You not only gain deep insight into the maze of technologies but also the principles of mobile content what makes it work how it s produced repurposed and delivered securely and how it integrates with mobile and Internet domains Learn about the key enablers of a mobile TV service like smartphones chipsets and mobile software Gain access to a detailed look at the networks deployed worldwide with real world case studies The informative diagrams provide rich visualization of the new technologies services and revenue models Gain understanding of how mobile TV can be made interactive and how it can be delivered seamlessly in multiple markets Get insight into the growing capabilities of multimedia handsets and software which drives innovative applications Author Amitabh Kumar begins with the basics of mobile multimedia and progresses to cover details of technologies networks and firmware for mobile TV services Easy to follow *Implementing Mobile TV* features a rich presentation that includes dozens of FAQs and Quick Facts This new edition is updated to reflect the quickly evolving world of Mobile TV focusing on factors for success and providing understanding of Business World ,2009 *Multimedia Journalism* Andy Bull,2010-02-26 *Multimedia Journalism A Practical Guide* offers clear advice on working across multiple media platforms and includes guides to creating and using video audio text and pictures It contains all the essentials of good practice and is supported by an Companion Website at www.multimediajournalism.co.uk which demonstrates how to apply the skills covered in the book gives examples of good and bad practice and keeps the material up to date and in line with new hardware software methods of working and legislation The book is fully cross referenced and interlinked with the website which offers the chance to test your learning and send in questions for industry experts to answer in their masterclasses Split into three levels getting started building proficiency and professional standards this book builds on the knowledge attained in each part and ensures that skills are introduced one step at a time until professional competency is achieved This three stage structure means it can be used from initial to advanced level to learn the key skill areas of video audio text and pictures and how to combine them to create multimedia packages Skills covered include writing news reports features email bulletins and blogs building a website using a content management system measuring the success of your website or blog shooting cropping editing and captioning pictures recording editing and publishing audio reports and podcasts shooting editing and
