Communication Donald H. Owings, Michael D. Beecher, Nicholas S. Thompson, 2013-11-11 ON THE FUTURE OF PERSPECTIVES When Patrick Bateson and Peter Klopfer offered me the editorship of Perspectives in 1992 the world of academic publishing was in one of its periodic upheavals Subscriptions to series even distinguished series such as Perspectives had been declining and individual volume prices had been rising a trend that if continued could only result in the series pricing itself out of the market In the course of the negotiations around the change of editors the publishers offered a cost cutting solution change the production pattern to camera ready and eliminate the costs of indexing and

proofreading While I could see the sense in this proposal I was reluctant to accept it Part of what I had always liked about the volumes in this series was that they were real books intelligently proofread nicely laid out and provided with proper indexes Thus I in return offered a Devil s bargain the publisher should maintain the present quality of the series for two more volumes and make a renewed effort to advertise the series to our ethological and sociobiological colleagues while I as the new series editor committed myself to a renewed effort to make Perspectives the publication of choice for writers who are trying to get their message out to the world intact and readers who are seeking clear coherent comprehensive and untrammelled presentations of authors ideas and research programs

Kantian Imperatives and Phenomenology's Original Forces Randolph C. Wheeler,2008 **Top Gun Governance** Derek M. Stevens,2023-11-30 Governance and management have a big problem Organizations must learn to thrive in our highly interdependent world even as that world is changing more rapidly and in more unpredictable and uncontrollable ways Organizations need to become much more situation aware Situation awareness is a mainstay of air force and military doctrine nuclear power plant management aviation and ERs among others These are all disciplines where mistakes in understanding a situation and predicting its outcome may not only be costly but also fatal Top Gun Governance adapts and scales insights and practices from the field of situation awareness to promote better sense making and prediction throughout your whole organization More than big data this next generation governance will help you challenge your decision making biases recognize when events and trends are breaking current rules and assumptions and manage the changes they inevitably bring This is a book for leaders and those who must see changes with clear eyed dispassion and create implement and sustain a culture of change in a highly dynamic world How did this book come about In a word COVID How did public health guidance which had been successful in managing past epidemics become so contentious This question led to the following train of thought Why change programs are so difficult when even simple interventions like mask wearing are rejected by large segments of the population to Thinking that different situations characterized by their degree of unpredictability require different communication and change management techniques to Understanding how cognitive biases take hold and reinforce positions that become very entrenched to Realizing that concepts and practices in situation awareness a discipline used extensively in environments where mistakes can be fatal could be a good approach to Using experience in organization architecture to describe ways in which situation awareness could be scaled to the organization level under the umbrella of governance So yes a somewhat convoluted path but one that I hope demonstrates the breadth and depth of focus in looking at very complex problems and one that informs this book
