those without children either couldn't or didn't want to be parents the truth is much more complex Jody Day was forty four when she realized that her quest to be a mother was at an end She presumed that she was through the toughest part but over the next couple of years she was hit by waves of grief despair and isolation Eventually she found her way and in 2011 created Gateway Women the global friendship and support network for childless women which has now helped almost two million people worldwide This edition previously titled *Rocking the Life Unexpected* has been extensively revised and updated with significant additional content and case studies from forty involuntarily childless people mostly women from around the world

God, Probability, and Life after Death William Hunt, 2017-11-22 *God Probability and Life after Death* reveals its objective in its title namely to present an exploratory argument concerning the probability of human resurrection The exploratory argument follows a probabilistic passage along an evidential trail to the discovery of the probability of life after death It is a trail that the reader can personally engage with in order to reach their own conclusion and even introduce additional evidence they think relevant The argument begins with the probability of the existence of God and once a position is established on this issue the argument becomes empowered for the next stage which is to address the evidence for human resurrection namely the Resurrection of Jesus near death experiences and apparitions The probabilistic relationship between the evidence and the resurrection hypothesis is critically examined throughout the book by engaging the potential views of an atheist and agnostic in addition to that of a theist On this probabilistic journey other issues relevant to the resurrection argument are introduced such as personal identity and the possibility of resurrection given the nature of our world Evidence and argument for a non supernatural possibility for human resurrection are also considered Significantly the author does not assume the normal spiritual approach to human resurrection when a disembodied soul leaves the body to continue a spiritual existence in a ghostly realm Instead a materialistic approach is taken whereby the resurrected person survives in bodily form in a physical realm The use of probability theory is intended to keep the evidential argument within the bounds of coherent reasoning It also enables the argument to link one piece of evidence to the next in a probabilistic sequence that eventually leads to the conclusion that human resurrection is not only possible it is also very likely

Life After Privatization Raj S. Chari, 2015 *Life After Privatization* offers a refreshing and original theoretical conceptualization of what happened to state-owned enterprises after they were privatized from the late 1970s onwards Some privatized firms have become today's European and global giants Alphas merging with or acquiring other firms whereas other firms Betas have been taken over by Alphas or other sectoral leaders The book raises questions such as which privatized firms in the airline automobile and the electricity sectors in the UK France Germany Italy and Spain are Alphas and Betas today And why Building on a variety of themes from both Political Science and Business Studies it considers a comprehensive set of explanations both internal and external to the firm to analyse why a firm may become an Alpha or a Beta The evidence shows that while internal factors are important the more external political factors are necessary and sufficient to explain why a firm becomes an Alpha or a Beta

This includes the impact of liberalization the roles of states and the actions of regulators that are lobbied by firms Based on exhaustive evidence *Life After Privatization* concludes with a novel inductive theory which offers a significant step forward for social science scholars and practitioners understanding of the politics businesses face in global markets **Life after Tragedy** Michael W. Brierley, Georgia A. Byrne, 2018-01-01 Much has been written on the centenary of the First World War however no book has yet explored the tragedy of the conflict from a theological perspective This book fills that gap Taking their cue from the famous British army chaplain Geoffrey Studdert Kennedy seven central essays all by authors associated with the cathedral where Studdert Kennedy first preached to troops examine aspects of faith that featured in the war such as the notion of home poetry theological doctrine preaching social reform humanitarianism and remembrance Each essay applies its reflections to the life of faith today The essays thus represent a highly original contribution to the history of the First World War in general and the work of Studdert Kennedy in particular and they provide wider theological insight into how in the contemporary world life and tragedy God and suffering can be integrated The book will accordingly be of considerable interest to historians both of the war and of the church to communities commemorating the war and to all those who wrestle with current challenges to faith A foreword by Studdert Kennedy's grandson and an afterword by the bishop of Magdeburg in Germany render this a volume of remarkable depth and worth **The Spirit of Design** Stuart

Walker, 2021-12-24 Imaginative design will be a crucial factor in enacting sustainability in people's daily lives Yet current design practice is trapped in consumerist cycles of innovation and production making it difficult to imagine how we might develop a more meaningful and sustainable rendition of material culture Through fundamental design research *The Spirit of Design* challenges a host of common assumptions about sustainability progress growth and globalization Walker's practice based explorations of localisation human meaning and functional objects demonstrate the imaginative potential of research through design and yield a compelling constructive and essentially hopeful direction for the future one that radically reimagines our material culture by meshing mass production with individuality products with place and utilitarian benefit with environmental responsibility In so doing the author explores How understandings of human meaning affect design and how design can better incorporate issues of personal meaning How mass production needs to become integrated with localised production and service provision How short lived electronic goods can be brought into a more sustainable design paradigm The changing role of the designer in a post consumerist world Taking a design centred approach a combination of creative propositional design practice reasoned argument and theoretical discussion the book will impel readers to investigate the nature of contemporary material culture and its relationship to both the natural environment and to deeper notions of human meaning **Life After Logging** E. Iskandar, Titiek Setyawati, Martjan Lammertink, Ike Rachmatika, Anna Wong, Tonny Soehartono, Scott Stanley, Timothy O'Brien, 2005-01-01 This book presents a technical review of ecological and life history information on a range of Bornean

wildlife species aimed at identifying what makes these species sensitive to timber harvesting practices and associated impacts It addresses three audiences 1 those involved in assessing and regulating timber harvesting activities in Southeast Asia 2 those involved in trying to achieve conservation goals in the region and 3 those undertaking research to improve multipurpose forest management This book shows that forest management can be improved in many simple ways to allow timber extraction and wildlife conservation to be more compatible than under current practices The recommendations can also be valuable to the many governmental and non governmental organisations promoting sustainable forest management and eco labelling Finally it identifies a number of shortcomings and gaps in knowledge which the hope can interest the scientific community and promote further research This review is an important scientific step toward understanding and improving sustainable forestry practices for long term biodiversity conservation Even in the short term however significant improvements can be made to improve both conservation and the efficiency of forest management and there is no need to delay action due to a perceived lack of information In the longer term it is expected that the recommendations from this review will be implemented and that further research will continue to help foster an acceptable balance among the choices needed to maintain healthy wildlife populations and biodiversity in a productive forest estate **Jan Patočka and the**
