

# GOALS FOR LIFE

## WHAT ARE THEY?

Goals for life refer to specific, meaningful objectives that individuals set for themselves to achieve and fulfill over the course of their lifetime. These goals are intended to provide direction, motivation, and a sense of purpose, guiding individuals in their pursuit of personal growth, success, and fulfillment.

## EXAMPLES

**Short-Term** - These can be achieved in less than 3 months and should support your longer-term goals, e.g. "exercise 30 minutes a day".

**Long-Term** - These are the future goals you want from your life and will take 5 to 25 years, e.g. "live healthily into my 70s."

**Society** Roy K. Lintz,2003-08 Talking with Patients About the Personal Impact of Illness Leonore Buckley,Dennis J. Shale,2018-04-19 This book explores the psychosocial impact of serious illness its effect on a person s identity and relationships and the doctor s role in counseling patients Even the most seasoned physician often feels inadequate when it comes to discussing the personal impact of disability and serious illness with patients It takes time attention and skill Most physicians who are good at this learn what to say from observations of physicians they respect and the conversations they share with patients over many years of practice Like everything else in medicine there is a continuous learning curve This book offers a beginning It includes first hand experiences and reflections on serious illness by physicians and patients concrete advice on how to initiate discussions of difficult psychosocial issues topics for organising discussion suggested

readings and guides for patient interviews Much is written about patient centered care and the patient experience What sets this book apart is first Lenore Buckley s ability to tell stories about her own medical experience These teaching tales give young physicians a sense of the task that their profession requires of them while keeping that task within human proportions Second and complementing that is her excellent compilation of quotations and stories from the memoirs of patients and physicians especially physicians as patients I hope this empathic useful collection of materials for teaching and reflection finds its way into medical school curricula and I hope it is one of those books that physicians return to during years of practice especially when they sense that the treatment expert is crowding the witness out of the room Patients need both doctors Lenore Buckley shows how doctors are able to expect nothing less of themselves Arthur W Frank in the Foreword
