Towards a holistic approach to support learners at risk of interrupted development Macalane J. Malindi, Johnnie Hay, Thabo Makhalemele, 2024-02-23 The COVID-19 pandemic and the restrictions that came with it led to unprecedented disruptions in learner development and put them at risk of poor developmental outcomes. It is thus important that the extent of the disruption on their development and the support needs of learners be investigated. Researching the impact of the disruption should focus on holistic development. In this book, the authors use multiple research approaches and methods of gathering data in their respective fields to examine the impact of the disruption and determine the support needs of learners. Data gathered through the different methods are processed and findings are presented. The findings have implications for both practice and future research in the fields of inclusive education, learner support, educational psychology, movement education, Life Orientation and curriculum development. Handbook of Social Psychology Jan E. Stets, Karen A. Hegtvedt, Long Doan, 2025-08-31 This third edition of the highly successful handbook is presented for the first time in two volumes covering the field of social psychology more comprehensively than earlier, including applying social psychology to different areas in sociology. It showcases the dynamics of social psychological phenomena across the micro level. Volume 1 and meso and macro levels of social reality. Volume 2: The reader will see how social psychology can be leveraged at the interactive level within groups and larger units and across many aspects of society, thus showing the expansiveness of social psychology in understanding social behavior, social organization and social structures. Volume 2 highlights the relevance of social psychological principles and processes to social categories, groups and organizations at the meso level and to institutions and inequality that reflect social life at the macro level. Chapters pertaining to the meso level analyze individuals' memberships in social categories such as gender, race, class, age and sexuality. Additionally, meso-level concerns spotlight the context of work and organizations. Chapters at the macro level consider socially psychologically oriented work in such institutions as the family, education and religion and examine other areas such as crime and deviance, the media, immigration and health. Together, the two volumes provide the reader with theoretical tools useful in understanding the basics of individual behavior while highlighting how social psychological processes emerge in a variety of contexts. The connections

among micro meso and macro levels through the lens of social psychology forge new pathways to understanding the various forms of inequality plaguing the social world
