

**ATENCIÓN** (continuación)

- Evite cualquier cortocircuito en el sistema eléctrico, sobre todo en los puntos de la rueda de arranque (→ página 194). La batería podría explotar.
- No toque nunca el ventilador del radiador. Su funcionamiento depende de la temperatura y podría causar un incendio de repente (incluse con el motor/delante desconectado o la llave de encendido retirada).
- No abra nunca el tapón del depósito del líquido refrigerante mientras el motor está caliente. Debido a la elevada temperatura del líquido refrigerante, el sistema de refrigeración se halla bajo presión.
- Para protegerse la cara, las manos y los brazos contra el vapor caliente o bien el líquido refrigerante caliente que pueda salir, se debe cubrir el tapón con un paño grande al abrir el depósito.
- No olvide nunca ningún objeto en el vano motor, como p. ej., paños o herramientas.
- Si se ve obligado a realizar trabajos debajo del vehículo, fíjelo primero para que no se desplace y alóquelo con cables de sujeción para evitar posibles lesiones. El gas escapado no es suficiente y existe riesgo de lesiones.

**ATENCIÓN**

En el caso de que se deban realizar trabajos durante el arranque o con el motor en marcha, deberá tener siempre en cuenta el grave peligro que representan los componentes giratorios (como, p. ej., la correa poli V, el alternador, el ventilador del radiador) y el sistema de encendido de alta tensión. Además de ello tenga en cuenta lo siguiente:

**ATENCIÓN** (continuación)

- No toque nunca los cables eléctricos del sistema de encendido.
- Si lleva joyas, pendientes de ropa hebillados o el cabello suelto, evite cualquier contacto con piezas giratorias del motor. Existe peligro de muerte. Por ello, quítelos primero: las joyas, inclúyase el pelo y póngase ropa recbida.
- No ande nunca con una velocidad exagerada sin la debida precaución. El vehículo podría desplazarse incluso con el freno de mano puesto. Existe peligro de muerte.

**ATENCIÓN**

Si es necesario realizar trabajos en el sistema de combustible o en el sistema eléctrico, tenga en cuenta además lo siguiente:

- Desconecte siempre la batería del vehículo de la red de a bordo. Para ello el vehículo debe estar desdibloqueado, de lo contrario se dispararía la alarma.
- No fumar.
- Evite siempre trabajar en lugares expuestos a flamas.
- Tenga siempre a mano un extintor.

**Cuidado!**

Procure no confundir los líquidos operativos al operar los cables. Pues podría provocar deterioros graves en el funcionamiento y daños en el motor.

**Nota relativa al medio ambiente**

Los líquidos operativos del vehículo son contaminantes. Por ello deberá controlar regularmente el medio de debajo del vehículo. Lleve el vehículo a un taller especializado para que lo revise, si es al lugar donde ha estado operando hay manchas de aceite o de otros líquidos. **4**

**Apertura del capó del motor**

*El capó del motor se desbloquea desde el interior del vehículo.*

Fig. 9 Detalle de la zona superior del tablero del conductor para el desbloqueo del capó del motor.

Fig. 10 Detalle de la perilla del radiador para abrir el capó del motor.

Antes de abrir el capó del motor, asegúrese de que los brazos limitadores descansen sobre el parafletero, ya que, de lo contrario, podrían causar desperfectos en la pintura o daños en el vehículo.

- Tire de la palanca que se encuentra debajo del tablero de instrumentos (→ fig. 9 en dirección de la flecha). El capó se desbloquea de sí mismo mediante un resorte **4**.

- Oprima la palanca de desbloqueo (→ fig. 10) hacia arriba y levante el capó hasta que se mantenga abierto mediante el amortiguador de gas presurizado.

**Indicador de capó del motor abierto<sup>1)</sup>**

Cuando el motor/delante se encuentra abierto, una luz roja indica al capó delantero se encuentra abierto. Además puede aparecer un mensaje en el cuadro de instrumentos que le informe a lo que se refiere que realice algunas acciones.

El símbolo de advertencia (→ símbolo) aparece cuando el capó delantero está completamente cerrado (basta al segundo encendido) (→ página 32).

Si aparece una indicación en la pantalla<sup>2)</sup>, también se podrá ver con el motor/delante desconectado. Después de cerrar el vehículo, el indicador se debe apagar después de unos 5 minutos.

**ATENCIÓN**

Si el líquido refrigerante está caliente, puede sufrir quemaduras.

- No abra nunca el capó si sale vapor, humo o líquido refrigerante del vano motor. Espere a que deje de salir vapor, humo o líquido refrigerante antes de abrir con cuidado el capó del motor.
- Lea y tenga en cuenta las advertencias correspondientes (→ página 48 antes de realizar cualquier trabajo en el vano motor). **4**
