**The Congo from Leopold to Kabila** Georges Nzongola-Ntalaja,2013-07-18 The people of the Congo have suffered from a particularly brutal colonial rule American interference after independence decades of robbery at the hands of the dictator Mobutu and periodic warfare which continues even now in the East of the country But as this insightful political history makes clear the Congolese people have not taken these multiple oppressions lying down and have fought over many years to establish democratic institutions at home and free themselves from foreign exploitation indeed these are two aspects of a single project Professor Nzongola Ntalaja is one of his country s leading intellectuals and his panoramic understanding of the personalities and events as well as class ethnic and other factors make his book a lucid radical and utterly unromanticized account of his countrymen s struggle His people s defeat and the state s post colonial crisis are seen as resulting from a post independence collapse of the anti colonial alliance between the masses and the national leadership This book is essential reading for understanding what is happening in the Congo and the Great Lakes region under the rule of the late President Kabila and now his son It will also stand as a milestone in how to write the modern political history of Africa **English in**

**Marketing** Sylva-Michèle Sternkopf,2005-09-30 What measures do German SMEs take to successfully present themselves on the international market place In contrast to larger groups where dedicated communication departments cooperate closely with renowned advertising agencies to disseminate the marketing message and to reach exactly the right target groups corporate communication in medium sized companies is often characterised by ad hoc decisions tight budgets and a lower esteem for the value of professional communication This empirical survey investigates International Communication Strategies in SMEs uncovers reasons and consequences of this approach illuminates the role of the English language in international marketing and provides tangible tips what SMEs can do to improve their international market presence

*Cities of Entanglements* Barbara Heer,2019-09-02 How do people live together in cities shaped by inequality This comparative ethnography of two African cities Maputo and Johannesburg presents a new narrative about social life in cities often described as sharply divided Based on the ethnography of entangled lives unfolding in a township and in a suburb in Johannesburg in a bairro and in an elite neighborhood in Maputo the book includes case studies of relations between domestic workers and their employers failed attempts by urban elites to close off their neighborhoods and entanglements emerging in religious spaces and in shopping malls Systematizing comparison as an experience based method the book makes an important contribution to urban anthropology comparative urbanism and urban studies *Language and Business* Sylvia-Michèle Sternkopf,2004-07-28 Inhaltsangabe Abstract Small and medium sized enterprises SMEs are the backbone of the German economy Against the background of continuing globalisation they are increasingly faced with the challenge of internationalisation This study was designed as an empirical investigation of how well SMEs in the federal state of Saxony

are prepared for this task of the future which measures they take in order to market their products and services in the global marketplace and it tries to identify their strengths and weaknesses in this respect The very nature of this thesis is thus a truly interdisciplinary approach investigating marketing aspects as well as linguistic factors The main focus was on the language small and medium sized companies use for their international communications English has long become the lingua franca of the globalising economy and this study set out to investigate how well SMEs are prepared to meet the linguistic requirements imposed on them by global business Enterprises in the new German states are widely believed to be disadvantaged with regard to their communicative competence in English since English played only a minor role for decades but has risen to decisive significance within the past couple of years taking many companies and their employees by surprise finding them not as well prepared as their colleagues in the old German states Still finding their way to the new export markets in Western Europe the Americas and Asia are vital for the survival of Saxon economy and communicative competence in English as the lingua franca of international business is the major prerequisite for achieving this objective Corporate communicative competence involves various aspects including the foreign language skills of the employees covering the entire range of linguistic skills from oral communication including listening and speaking giving presentations or participating in negotiations to writing skills ranging from reading and writing of various text types including media literacy Apart from the personal linguistic competence of the employees the corporate linguistic competence of the company also plays a major role for the perception of the company on its international markets Therefore this study focused on investigating how well SMEs present themselves in their corporate literature and on the internet which instruments from the wide ranging selection of marketing tools they apply for communicating

### **High Noon in the Automotive Industry**

Helmut Becker, 2005-12-06 This book was born from curiosity To begin with it was the curiosity of an economist who studied in the 60 s in an environment which has subsequently developed from national into global economics Who has to recognize that politicians scholars and large segments of society oblivious to supranational authorities and economic globalization forces continue to labour under the notion that they are still fully autonomous and sovereign when shaping national economic policy And pretend as though their own national state were still the master in its own house that despite unbridled market economics could continue to dictate to the economy and companies how to live and in which rooms All that has become fiction The laws of globalization diminish the manoeuvring space for shaping national economic policy Even if many folks today don't want to hear it The issue is no longer achieving what is socially politically desirable for the own society but rather the optimal adaptation of society and social benefits to the politically practicable
