Carl Sagan was perhaps one of the most influential scientific minds that the world has ever experienced. When he learned that stars were actually extremely distant suns, his world was changed and the magnitude of the universe opened up to him. Another strong motivator into science came with his reading of a popular science fiction book of the time, *The Barroths Tales*. The stories were not extremely sound scientifically, but still presented ideals of adventure and the unknown. The idea that life could exist elsewhere in the universe fascinated Sagan and remained with him for the rest of his life (Escher).

Perhaps one of Sagan's most famous individual accomplishments was his involvement with the *Pioneer 10 Space Probe*. The probe was created to be the first object to exit our galaxy. Sagan acknowledged that the chances of anything actually discovering the probe were astronomical, but believed that it was important to promote public appreciation for science and thought the project to be "all in good fun" (McDonough 50).

Public appreciation for science was, in fact, what made Sagan the "superstar scientist" that we hear of today. His ability to portray complex

Teaching Research Processes William Badke,2012-02-29 Information literacy may be defined as the ability to identify a research problem decide the kinds of information needed to tackle it find the information efficiently evaluate the information and apply it to the problem at hand Teaching Research Processes suggests a novel way in which information literacy can come within the remit of teaching faculty supported by librarians and reconceived as research processes The aim is to transform education from what some see as a primarily one way knowledge communication practice to an interactive practice involving the core research tasks of subject disciplines This title is structured into nine chapters covering

- Defining research processes
- Research ability inadequacies in higher education
- Research processes and faculty understanding
- Current initiatives in research processes
- The role of disciplinary thinking in research processes
- Research processes in the classroom
- Tentative case studies in disciplinary research process instruction
- Research processes transforming education and
- Resourcing the enterprise

The book concludes by encouraging the reader to implement the teaching of research processes Engages the domain of teaching faculty rather than librarians only Analyzes

the reasons why the research processes concept represents a gap in academia Focuses on research ability as a process that can be taught within disciplines Bloom's How to Write about Gabriel Garcí'a Ma'rquez Eric L. Confessions of an English Teacher: A Memoir of My Teaching Years Richard P. Sinay, 2024-07-24 Confessions of an English Teacher A Memoir of My Teaching Years was written to share some of my extraordinary experiences teaching English at six high schools and seven community colleges in Orange County California from 1973 to 2018 I share these memories because they were so disappointing in their discovery I imagined that as an English teacher I was prepared to teach the subject I was trained for but I learned that was far from the truth My training as an English teacher should have prepared me to teach essential skills It did not As I reflect on my teaching at these schools I discovered that my English degree needed to produce a prepared English teacher for teaching the skills of reading grammar and writing Looking back at what I was mandated to teach revealed a sad truth teaching English to high school and college students was filled with traditions that needed to change With what I discovered to be traditional problems in teaching English I offer recommendations for change for high schools and community colleges **na**,
