Text, Context and Construction of Identity Rajesh Kumar, Om Prakash, 2019-04-30 Language is central to our existence and it happens to be the most sophisticated product of the human mind. It is inconceivable to think of ourselves, our societies, our ideas, cultures, or identities without language. It is the primary means of socialization and whatever we know is a result of it. It is the primary medium of construction and dissemination of knowledge and structures our thought processes in important ways that constitute our identity. In very complex ways it interacts with the social, political, and economic power structures that remain significant in defining the identities of individuals and societies. The essays in this volume create an awareness and understanding about the role of linguistic context in negotiating identity. The book explains identity and the complex relations between language and several aspects of our society. It explores identity through text and context and will serve to trigger a novel discourse around the centrality of identity in contemporary society.
