

Chemistry – Unit 7 Review

Chemical Reaction Model

1. Describe key characteristics of all chemical reactions, including the role of energy. Explain how a balanced equation represents these features (include an example).

In chemical reactions, atoms of the reactants recombine to form new substances in the products. There is almost always some transfer between the thermal and chemical energy accounts as well as an exchange of thermal energy via heating (Q) between the system and surroundings. The balanced chemical equation represents this process symbolically, showing that the atoms in the products are the same as those in the reactants

Note: there are 4 atoms of H and 2 atoms of O on each side of the equation.

Applying the Model

2. Balance the reaction below by drawing any additional reactant and/or product molecules that would be needed.

Write the **balanced equation** for this reaction.

Which of these molecules would be called reactants?

DB₂, CD₂, and BAC are reactants

Modeling Chemistry U7 Rearrange V2 0 Answer Key

Xiang Xie

Modeling Chemistry U7 Rearrange V2 0 Answer Key:

If you ally need such a referred **Modeling Chemistry U7 Rearrange V2 0 Answer Key** books that will find the money for you worth, acquire the very best seller from us currently from several preferred authors. If you want to hilarious books, lots of novels, tale, jokes, and more fictions collections are next launched, from best seller to one of the most current released.

You may not be perplexed to enjoy all books collections Modeling Chemistry U7 Rearrange V2 0 Answer Key that we will entirely offer. It is not nearly the costs. Its roughly what you compulsion currently. This Modeling Chemistry U7 Rearrange V2 0 Answer Key, as one of the most in action sellers here will categorically be among the best options to review.
