Chemistry in the Community (ChemCom) American Chemical Society, 2011-06-17 Touted as the most successful NSF funded project published *Chemistry in the Community ChemCom* by the American Chemical Society ACS offers a meaningful and memorable chemistry program for all levels of high school students ChemCom covers traditional chemistry topics within the context of societal issues and real world scenarios Centered on decision making activities where students are responsible for generating data in an investigating analyzing that data and then applying their chemistry knowledge to solve the presented problem The text is intensively laboratory based with all 39 of the investigations integrated within the text not separate from the reading With the ChemCom program students learn more organic and biochemistry more environmental and industrial chemistry and more on the particulate nature of matter than other textbooks all within the relevance of solving problems that arise in everyday life Meticulously updated to meet the needs of today's teachers and students the new sixth edition of ChemCom adheres to the new science framework as well as the forthcoming next generation of science standards Incorporating advances in learning and cognitive sciences ChemCom's wide ranging coverage builds upon the concepts and principles found in the National Science Education Standards Correlations are available showing how closely aligned ChemCom is to these and other state standards

Philosophy of Chemistry Jaap Brakel, 2000 This book addresses themes in the newly emerging discipline of philosophy of chemistry in particular issues in connection with discussions in general philosophy of science on natural kinds reduction and ceteris paribus laws The philosophical issue addressed in all chapters is the relation between on the one hand the manifest image the daily practice or common sense life form and on the other the scientific image both of which claim to be the final arbiter of everything With respect to chemistry the question raised is this Where does this branch of science fit in with the manifest or scientific image Most philosophers and chemists probably would reply unhesitatingly the scientific image The aim of this book is to raise doubts about that self evidence It is argued that chemistry is primarily the science of manifest substances whereas micro or submicro scientific talk though important useful and insightful does not change what matters namely the properties of manifest substances These manifest substances their properties and uses cannot be reduced to talk of molecules or solutions of the Schrödinger equation If submicroscopic quantum mechanics were to be wrong it would not affect all or any microlevel chemical knowledge of molecules If molecular chemistry were to be wrong it wouldn't disqualify knowledge of say water not at the macrolevel e.g. its viscosity at 50 °C nor at the pre or protoscientific manifest level e.g. ice is frozen water

Simulation in Textile Engineering New Concepts Methods and Applications explains the advanced principles and techniques
that can be used to solve textile engineering problems using numerical modeling and simulation The book draws on
innovative research and industry practice to explain methods for the modeling of all of these processes helping readers apply
computational power to more areas of textile engineering Experimental results are presented and linked closely to processes
and methods of implementation Diverse concepts such as heat transfer fluid dynamics three dimensional motion and multi
phase flow are addressed Finally tools theoretical principles and numerical models are extensively covered Textile
engineering involves complex processes which are not easily expressed numerically or simulated such as fiber motion
simulation yarn to fiber formation melt spinning technology optimization of yarn production textile machinery design and
optimization and modeling of textile fabric reinforcements Provides new approaches and techniques to simulate a wide range
of textile processes from geometry to manufacturing Includes coverage of detailed mathematical methods for textiles
including neural networks genetic algorithms and the finite element method Addresses modeling techniques for many

It discusses physical properties for proprietary materials pharmaceutical and biopharmaceutical sector heuristics and
process design along with closed loop heat transfer systems heat exchangers packed columns and structured packings

Organized into 27 chapters the book begins with an overview of formulae and data for sizing piping systems for incompressible and compressible flow. It then moves to a discussion of design recommendations for heat exchangers, practical equations for solving fractionation problems along with design of reactive absorption processes. It also considers different types of pumps and presents narrative as well as tabular comparisons and application notes for various types of fans, blowers and compressors. The book also walks the reader through the general rules of thumb for vessels, how cooling towers are sized based on parameters such as return temperature and supply temperature and specifications of refrigeration systems. Other chapters focus on pneumatic conveying, blending and agitation, energy conservation and process modeling. Online calculation tools, Excel workbooks, guidelines for hazardous materials and processes and a searchable Rules of Thumb library are included. Chemical engineers faced with fluid flow problems will find this book extremely useful. Rules of Thumb for Chemical Engineers brings together solutions, information and work arounds that engineers in the process industry need to get their job done. New material in the Fifth Edition includes physical properties for proprietary materials, six new chapters including pharmaceutical, biopharmaceutical, sector heuristics, process design with simulation software and guidelines for hazardous materials and processes. Now includes SI units throughout alongside imperial and now accompanied by online calculation tools and a searchable Rules of Thumb library.
