

Drawing up the lower thread (bobbin)

For an impeccable finish to your sewing, it is recommended to bring up the lower thread from the bobbin before you start sewing.

49.1-2 Hold the needle thread towards the rear, **at the left (1)**.

Give a short press on the foot control, in order to make the needle descend and rise again. The lower thread will thus form a loop above the needle plate, (2), which you should free completely by hand.

50 Pass the two threads to the rear, under the presser foot. Draw them back over the thread cutter/gripper by putting them into the slit. Give the threads a slight tug to the left (3). They will be cut and remain fast in the thread cutter. Close the rotary hook cover.

Threading when using a twin needle

51.1-2 Raise the spool pin and the thread guide. Place the horizontal bobbin and the bobbin holder disc (as described under 46.1-4).

3 Slide the removable spool pin slant into the slots at the foot of the thread guide. Place the second bobbin. Proceed with threading in the same way as for a single thread, but ...

52 pass one thread through one side of the separating disc of the upper tension device and the other thread through the other side.

53 Pass one thread on each side of the needle clamp and thread one thread through each eye of the twin needle.

N.B.: Do not go beyond the stitch width 3.
