expertise in experimental computational and tissue biomechanics relating to aneurysm behavior and enable the reader to gain a fresh understanding of key factors influencing aneurysm behavior and treatment Biological risk factors such as tobacco smoking sex age hypertension family history and mechanobiological risk factors such as aneurysm geometry and shape as well as mechanical properties of the diseased tissues are considered in detail as are many of the diagnostic and treatment options

Molecular Mechanisms Determining Mammalian Oocyte Quality Ahmed Z. Balboula, 2024-07-19 As the age of childbearing increases reduced female gamete egg quality has emerged as the primary cause of infertility in women This book addresses molecular mechanisms that regulate oocyte quality as well as intrinsic and extrinsic factors that compromise these mechanisms Eggs are produced through a unique cell division called meiosis Oocyte meiosis is initiated early in fetal life Shortly before birth the oocyte undergoes a prolonged arrest at prophase I until the age of puberty at which selected oocytes resume meiosis I Following meiotic resumption and during oocyte maturation tight regulation of nuclear and DNA related mechanisms ensures proper homologous chromosome segregation prior to another arrest at metaphase II Any errors prior to completion of meiosis I can lead to chromosome segregation errors and aneuploidy the most common genetic cause of miscarriage and congenital disorders such as Down syndrome In addition to nuclear maturation several cytoplasmic processes are orchestrated to support cell division and to generate developmentally competent eggs capable of supporting fertilization and early embryonic development The interaction between these nuclear and cytoplasmic processes is critical for producing good quality oocytes This volume in the Advances in Anatomy Embryology and Cell Biology book series presents current reviews by leading experts It offers valuable insights for researchers physicians and Ph D students interested in reproductive biology particularly oocyte quality and meiosis
