It includes chapters on home health care, assisted living, and residential care, department of veteran affairs, and nursing facilities, among others. The second section focuses on clinical medicine in post acute and long term care and contains chapters on common clinical conditions, preventing hospital admissions and readmissions, palliative care, weight and nutrition, and wound care. The third section details psychosocial aspects of post acute and long term care. Chapters in this section describe dementia, delirium, depression, ethical and legal issues, and caring for families. The fourth and final section centers on special issues in post acute and long term care. This section focuses on documentation and coding, medication management, and rehabilitation, and maximizing function.
