Facts Are Facts English Edition:

The English Fact in Quebec Dominique Clift, Sheila McLeod Arnopoulos, 1984 The World and Language in Wittgenstein's Philosophy Gordon Hunnings, 1988-01-01 This book explores the interrelated concepts of representation and grammar in the philosophy of Ludwig Wittgenstein Throughout his life Wittgenstein was obsessed with the problem of the nature of language and the relationship between language and the world His intellectual journey one of the most compelling in twentieth century thought is the detailed adventure told by Gordon Hunnings in *The World and Language in Wittgenstein's Philosophy* This book surveys Wittgenstein's elucidation of how the world is represented in language including the posthumously published material of his middle period Early in his career Wittgenstein's answer to the problem explored the representational connection between language and the world through the analogy of propositions as logical pictures of facts Later his mature answer elucidated the concept of the world as a construction of logical grammar Hunnings shows how these shifting images of reality reflected in language also mirror the changes in Wittgenstein's philosophy **Wittgenstein in Translation** Dinda L. Gorrée, 2012-04-26 Apart from the *Tractatus* Wittgenstein did not write whole manuscripts but composed short fragments The current volume reveals the depths of Wittgenstein's soul searching writings his new philosophy by concentrating on ordinary language and using few technical terms In so doing Wittgenstein is finally given the accolade of a neglected figure in the history of semiotics The volume applies Wittgenstein's methodological tools to the study of multilingual dialogue in philosophy linguistics theology anthropology and literature Translation shows how the translator's signatures are in conflict with personal or stylistic choices in linguistic form but also in cultural content This volume undertakes the impossible task of uncovering the reasoning of Wittgenstein's translated texts in order to construct rather than paraphrase the ideal of a terminological coherence *God - Fact or Fiction* Luke VandenBerghe, 2014-05-28 The author develops the problem of God in a stimulating way by exploring science philosophy history and other disciplines He concludes that God does not exist because the supernatural does not exist and therefore God an entity of the supernatural also does not exist He regards religion as the biggest hoax ever released on mankind With his great erudition and critical reasoning he will incite the reader to serious thought The controversial topic will provoke a great deal of criticism and perhaps consequently contribute to clarification of the God's problem The main concern of the author remains the quest for truth from every possible angle The book is a modern testament The Greatest Works of French Literature (English Edition) Charles Baudelaire, George Sand, Anatole France, Molière, Voltaire, Stendhal, Émile Zola, Alexandre Dumas, Alexandre Dumas fils, Jules Verne, Victor Hugo, Marcel Proust, Guy de Maupassant, Jean-Jacques Rousseau, Jean Racine, François Rabelais, Gustave Flaubert, Gaston Leroux, Pierre Corneille, Pierre Choderlos de Laclos, 2020-12-17 This unique collection of the greatest French classics books has been designed and formatted to the highest digital standards A History of French Literature François Rabelais *Gargantua and Pantagruel* Molière *Tartuffe* or the Hypocrite *The Misanthrope* *The Miser* *The*

Facts, Values and Objectivity in Economics José Castro Caldas,Vítor Neves,2012-03-22

Is Economics an objective or positive science independent of ethical and political positions The financial crisis that began in 2007 gave rise to renewed doubts regarding the objectivity of economics and brought into the public arena a debate that was previously confined to academia A remarkable feature of the public debate on the value neutrality of economics since then was that it not only involved indictments of ideological biases in economic theory but also the attribution of the crisis itself to the unethical orientation of economic agents of economists acting as experts and of economic science itself The contributors to this volume believe that economists of all persuasions are once again compelled to probe the normative foundations of their discipline and give a public account of their doubts and conclusions
