Optimism, Literature, and Culture in American

Capitalism and Chinese Socialism Wendy Larson, 2025-10-09 This book examines and interprets the uncanny similarity between capitalism and socialism over the twentieth century as both systems found ways to encourage happiness and optimism in their citizens As inheritors of the Enlightenment's emphasis on scientific rationality these cultures sought to instill in their citizens a belief in progress in essence history shows steady improvement and the future will continue in this direction indefinitely Optimism which bears a temporal quality a continual gaze to the future is the favored state of mind in both capitalist and socialist societies which have embraced progress as a theory of history Related to optimism is happiness which emphasizes the present When progress as a theory of history is generally accepted happiness becomes a transference of future advancement into present subjectivity ultimately expressing acceptance of and satisfaction with society Fundamentally a literary study strongly embedded in history this project looks to fiction to show not only how imaginary characters became models for readers but also how narrative encouraged readers to engage in a struggle for new values Characters worked out or failed to work out questions related to the personal and larger cultural shaping of an ongoing optimism At the same time writers questioned these models and purposefully or otherwise displayed the downsides of excessive mandated or coerced optimism They also challenged the way in which optimism encompassed a belief in progress that itself could be camouflaged and the demands for a happiness that imposed everyone else's wellbeing before one's own The book compares Yang Mo's famous Song of Youth 1958 with Horatio Alger Jr's Ragged Dick 1868 Eleanor Hodgman Porter's Pollyanna 1913 and Frederick Kohner's Gidget 1957 Wang Meng's Long Live Youth written 1953 and A Young Man Arrives at the Organization Department 1956 are evaluated against Jack Kerouac's On the Road 1958 This study both incorporates and challenges various political and cultural theoretical concepts including revolutionary optimism permanent revolution the theory of literary typicality the New Soviet Person and the positive hero optimistic autosuggestion cultural authenticity and positive thinking

the debates over the contemporary condition across a range of issues such as neoliberalism self help and wellbeing as forms of ideology and control the shift to extremist proto fascist politics and of post truth The book unpacks arguments about affect and cognitive overload to make a positive case for the continuing power of reason and its emancipatory potential In that way the book provides a valuable insight into how we have come to view the brain as we have how that view is often misused and offers suggestions of ways to marshal an enriched democratic concept of the public brain for positive social change
