Fake News The Running Of The Models English Edition:

Securing the Digital Frontier Akashdeep Bhardwaj, 2025-09-17 **DESCRIPTION** The explosive growth of interconnected devices and digital platforms has led to cybersecurity becoming a cornerstone of modern technological infrastructure In an era of AI driven misinformation and smart IoT vulnerabilities innovative defense mechanisms are more critical than ever This book offers a structured and insightful journey through the evolving landscape of cybersecurity focusing on the pressing challenges posed by social media and IoT ecosystems Readers explore ML frameworks designed to detect fake news and distorted social media campaigns followed by methods to identify fake Instagram profiles and prevent impersonation The discussion advances into technical territory with a threat surface analysis of smart IoT cameras offering metrics to address their unique vulnerabilities The book concludes by introducing a novel cryptographic hash function and a comparative analysis of IoT communication protocols By the end of this book readers will be well equipped with the knowledge and practical skills needed to identify analyze and mitigate cybersecurity threats across social media and IoT ecosystems They will gain hands on expertise in machine learning based threat detection firmware analysis protocol evaluation and advanced cryptographic techniques empowering them to build and maintain more secure digital environments **WHAT YOU WILL LEARN** Understand the core principles of digital security and vulnerabilities in IoT infrastructures Learn to detect fake news manipulative campaigns and social media misinformation tactics Perform threat surface analysis of IoT camera systems Learn behavior based detection of advanced persistent threats Implement an intrusion detection and prevention system Apply taint analysis to detect firmware level vulnerabilities Introduce unique frameworks to enhance data integrity and resistance to hash based attacks Evaluate protocols like MQTT and CoAP using anomaly detection **WHO THIS BOOK IS FOR** This book is designed for advanced cybersecurity professionals IoT developers academic researchers graduate students and policymakers It is ideal for those looking to deepen their understanding of emerging cyber threats and learn practical research backed methods to secure digital and IoT ecosystems **TABLE OF CONTENTS** 1 Foundations of Securing Digital Ecosystems 2 Fake Social Media News Detection Framework 3 Machine Learning based Framework Detecting Fake Instagram Profiles 4 Unmasking Smart Device Vulnerabilities 5 Proactive Threat Hunts to Detect Persistence 6 Fortifying Smart Home Internet of Things Security 7 Framework for IoT Security in Smart Cities 8 Security Assessment of IoT Firmware 9 Polynomial based Secure Hash Design 10 Comparing Internet of Things Communication Protocols **Building Transformer Models with PyTorch 2.0** Prem Timsina, 2024-03-08 Your key to transformer based NLP vision speech and multimodalities **KEY FEATURES** Transformer architecture for different modalities and multimodalities Practical guidelines to build and fine tune transformer models Comprehensive code samples with detailed documentation **DESCRIPTION** This book covers transformer architecture for various applications including NLP computer vision speech processing and predictive modeling with tabular data It is a valuable resource for anyone looking to harness the power of transformer architecture in

their machine learning projects The book provides a step by step guide to building transformer models from scratch and fine tuning pre trained open source models It explores foundational model architecture including GPT VIT Whisper TabTransformer Stable Diffusion and the core principles for solving various problems with transformers The book also covers transfer learning model training and fine tuning and discusses how to utilize recent models from Hugging Face Additionally the book explores advanced topics such as model benchmarking multimodal learning reinforcement learning and deploying and serving transformer models In conclusion this book offers a comprehensive and thorough guide to transformer models and their various applications

WHAT YOU WILL LEARN Understand the core architecture of various foundational models including single and multimodalities Step by step approach to developing transformer based Machine Learning models Utilize various open source models to solve your business problems Train and fine tune various open source models using PyTorch 2.0 and the Hugging Face ecosystem Deploy and serve transformer models Best practices and guidelines for building transformer based models

WHO THIS BOOK IS FOR This book caters to data scientists Machine Learning engineers developers and software architects interested in the world of generative AI

TABLE OF CONTENTS

- 1 Transformer Architecture
- 2 Hugging Face Ecosystem
- 3 Transformer Model in PyTorch
- 4 Transfer Learning with PyTorch and Hugging Face
- 5 Large Language Models BERT GPT-3 and BART
- 6 NLP Tasks with Transformers
- 7 CV Model Anatomy ViT DETR and DeiT
- 8 Computer Vision Tasks with Transformers
- 9 Speech Processing Model Anatomy Whisper SpeechT5 and Wav2Vec
- 10 Speech Tasks with Transformers
- 11 Transformer Architecture for Tabular Data Processing
- 12 Transformers for Tabular Data Regression and Classification
- 13 Multimodal Transformers Architectures and Applications
- 14 Explore Reinforcement Learning for Transformer
- 15 Model Export Serving and Deployment
- 16 Transformer Model Interpretability and Experimental Visualization
- 17 PyTorch Models Best Practices and Debugging

Proceedings of International Conference on Intelligent Vision and Computing (ICIVC 2023) Apu Kumar Saha, Harish Sharma, Mukesh Prasad, 2024-10-28 This book contains outstanding research papers as the proceedings of the 3rd International Conference on Intelligent Vision and Computing ICIVC 2023 ICIVC 2023 has been organized by National Institute of Technology Agartala India under the technical sponsorship of the Soft Computing Research Society India It was held on November 25-26, 2023 at National Institute of Technology Agartala India The conference was conceived as a platform for disseminating and exchanging ideas concepts and results of the researchers from academia and industry to develop a comprehensive understanding of the challenges of the advancements of intelligence in computational viewpoints This book will help in strengthening congenial networking between academia and industry The conference focused on collective intelligence soft computing optimization cloud computing machine learning intelligent software robotics data science data security big data analytics signal and natural language processing

Sustainable International Business Pratik Arte, Yi Wang, Cheryl Dowie, Maria Elo, Salla Laasonen, 2023-12-15 This is a unique book that adopts a global approach to studying international business It stimulates

research and rethinking among scholars and practitioners to understand how businesses operate internationally into lucrative markets and their role in sustainable business growth global value creation and economic development. It provides insights into how international firms, entrepreneurs, family businesses, and other stakeholders balance the act of value creation and conducting sustainable and ethical business. The book covers economic, social, and environmental dimensions of sustainability such as poverty alleviation through FDI and remittances, diversity and inclusion in management, and ethical governance to value creation for stakeholders and profit maximization through sustainable firm growth, entrepreneurial initiatives, and sustainable business models. It addresses capacity building and the grand challenges that international business needs to develop solutions for. The chapters offer multiple types of contributions including conceptual and theoretical works, literature reviews, and empirical qualitative and quantitative studies. The authors and the topics included provide a wide international representation and illustrate multi-layered sustainable business perspectives that cover developing, emerging, and developed country contexts as well as multiple directions of international business flows.

Soft Computing and Signal Processing V. Sivakumar Reddy, V. Kamakshi Prasad, Jiachun Wang, K.T.V. Reddy, 2022-02-15. This book presents selected research papers on current developments in the fields of soft computing and signal processing from the Fourth International Conference on Soft Computing and Signal Processing ICSCSP 2021. The book covers topics such as soft sets, rough sets, fuzzy logic, neural networks, genetic algorithms, and machine learning and discusses various aspects of these topics, e.g., technological considerations, product implementation, and application issues.

Combating Online Hostile Posts in Regional Languages during Emergency Situation Tanmoy Chakraborty, Kai Shu, H. Russell Bernard, Huan Liu, Md Shad Akhtar, 2021-04-08. This book constitutes selected and revised papers from the First International Workshop on Combating Online Hostile Posts in Regional Languages during Emergency Situation CONSTRAINT 2021 Collocated with AAAI 2021 held as a virtual event in February 2021. The 14 full papers and 9 short papers presented were thoroughly reviewed and selected from 62 qualified submissions. The papers present interdisciplinary approaches on multilingual social media analytics and non-conventional ways of combating online hostile posts.

Higher Education Learning Methodologies and Technologies Online Giovanni Fulantelli, Daniel Burgos, Gabriella Casalino, Marta Cimitile, Giosuè Lo Bosco, Davide Taibi, 2023-04-30. This book constitutes the thoroughly refereed post-conference proceedings of the 4th International Conference on Higher Education Learning Methodologies and Technologies Online HELMeTO 2022 held in Palermo, Italy, in September 2022. The 59 revised papers presented were carefully reviewed and selected from a total of 126 submissions. The papers present recent research on challenges of implementing emerging technology solutions for online learning, pedagogical frameworks, online learning technologies in practice, online learning strategies, and resources, etc.

Advances in Information Retrieval Nazli Goharian, Nicola Tonellotto, Yulan He, Aldo Lipani, Graham McDonald, Craig Macdonald, Iadh Ounis, 2024-03-14. The six-volume set LNCS 14608, 14609, 14610, 14611, 14612, and 14613 constitutes the refereed

proceedings of the 46th European Conference on IR Research ECIR 2024 held in Glasgow UK during March 24 28 2024 The 57 full papers 18 finding papers 36 short papers 26 IR4Good papers 18 demonstration papers 9 reproducibility papers 8 doctoral consortium papers and 15 invited CLEF papers were carefully reviewed and selected from 578 submissions The accepted papers cover the state of the art in information retrieval focusing on user aspects system and foundational aspects machine learning applications evaluation new social and technical challenges and other topics of direct or indirect relevance to search

Advances in Information Retrieval Djoerd Hiemstra, Marie-Francine Moens, Josiane Mothe, Raffaele Perego, Martin Potthast, Fabrizio Sebastiani, 2021-03-29 This two volume set LNCS 12656 and 12657 constitutes the refereed proceedings of the 43rd European Conference on IR Research ECIR 2021 held virtually in March April 2021 due to the COVID 19 pandemic The 50 full papers presented together with 11 reproducibility papers 39 short papers 15 demonstration papers 12 CLEF lab descriptions papers 5 doctoral consortium papers 5 workshop abstracts and 8 tutorials abstracts were carefully reviewed and selected from 436 submissions The accepted contributions cover the state of the art in IR deep learning based information retrieval techniques use of entities and knowledge graphs recommender systems retrieval methods information extraction question answering topic and prediction models multimedia retrieval and much more

Information and Communications Security Cristina Alcaraz, Liqun Chen, Shujun Li, Pierangela Samarati, 2022-08-23 This LNCS 13407 constitutes the refereed proceedings of the 24th International Conference on Information and Communications Security ICICS 2022 held in Canterbury UK in September 2022 The 34 revised full papers presented in the book were carefully selected from 150 submissions The papers are organized around the following topics Cryptography Authentication Privacy and Anonymity Attacks and Vulnerability Analysis Artificial Intelligence for Detection and Network Security and Forensics

10 Machine Learning Blueprints You Should Know for Cybersecurity Rajvardhan Oak, 2023-05-31 Work on 10 practical projects each with a blueprint for a different machine learning technique and apply them in the real world to fight against cybercrime Purchase of the print or Kindle book includes a free PDF eBook Key Features Learn how to frame a cyber security problem as a machine learning problem Examine your model for robustness against adversarial machine learning Build your portfolio enhance your resume and ace interviews to become a cybersecurity data scientist Book Description Machine learning in security is harder than other domains because of the changing nature and abilities of adversaries high stakes and a lack of ground truth data This book will prepare machine learning practitioners to effectively handle tasks in the challenging yet exciting cybersecurity space The book begins by helping you understand how advanced ML algorithms work and shows you practical examples of how they can be applied to security specific problems with Python by using open source datasets or instructing you to create your own In one exercise you ll also use GPT 3 5 the secret sauce behind ChatGPT to generate an artificial dataset of fabricated news Later you ll find out how to apply the expert knowledge and human in the loop decision making that is necessary in the cybersecurity space This book is designed to address the lack

of proper resources available for individuals interested in transitioning into a data scientist role in cybersecurity It concludes with case studies interview questions and blueprints for four projects that you can use to enhance your portfolio By the end of this book you ll be able to apply machine learning algorithms to detect malware fake news deep fakes and more along with implementing privacy preserving machine learning techniques such as differentially private ML What you will learn Use GNNs to build feature rich graphs for bot detection and engineer graph powered embeddings and features Discover how to apply ML techniques in the cybersecurity domain Apply state of the art algorithms such as transformers and GNNs to solve security related issues Leverage ML to solve modern security issues such as deep fake detection machine generated text identification and stylometric analysis Apply privacy preserving ML techniques and use differential privacy to protect user data while training ML models Build your own portfolio with end to end ML projects for cybersecurity Who this book is for This book is for machine learning practitioners interested in applying their skills to solve cybersecurity issues Cybersecurity workers looking to leverage ML methods will also find this book useful An understanding of the fundamental machine learning concepts and beginner level knowledge of Python programming are needed to grasp the concepts in this book Whether you re a beginner or an experienced professional this book offers a unique and valuable learning experience that ll help you develop the skills needed to protect your network and data against the ever evolving threat landscape

Proceedings of the 2nd International Conference on Cognitive and Intelligent Computing Amit Kumar,Gheorghita Ghinea,Suresh Merugu,2023-10-01 This book includes original peer reviewed articles from the 2nd International Conference on Cognitive Intelligent Computing ICCIC 2022 held at Vasavi College of Engineering Hyderabad India It covers the latest trends and developments in areas of cognitive computing intelligent computing machine learning smart cities IoT artificial intelligence cyber physical systems cybernetics data science neural network and cognition This book addresses the comprehensive nature of computational intelligence cognitive computing AI ML and DL to emphasize its character in modeling identification optimization prediction forecasting and control of future intelligent systems Submissions are original unpublished and present in depth fundamental research contributions either from a methodological application perspective in understanding artificial intelligence and machine learning approaches and their capabilities in solving diverse range of problems in industries and its real world applications

Multi-Strategy Learning Environment Vrince Vimal,Isidoros Perikos,Amrit Mukherjee,Vincenzo Piuri,2024-05-28 The book presents selected papers from International Conference on Multi Strategy Learning Environment ICMSLE 2024 held at Graphic Era Hill University Dehradun India during 12 13 January 2024 This book presents current research in machine learning techniques deep learning theories and practices interpretability and explainability of AI algorithms game theory and learning multi strategy learning MSL in distributed and streaming environments and adaptive data analysis and selective inference

Proceedings of 4th International Conference on Artificial Intelligence and Smart Energy S. Manoharan,Alexandru Tugui,Zubair Baig,2024-06-11 This book presents a

comprehensive collection of research chapters focusing on innovative solutions to energy and sustainability challenges. It reflects the collaborative efforts of researchers worldwide showcasing novel approaches to complex problems. Topics discussed range from securing cyber physical systems to revolutionizing healthcare with AI and robotics emphasizing sustainable research. The book emphasizes smart and sustainable energy solutions highlighting advancements in solar panel efficiency, fault analysis, and fuzzy controlled converters for grid-tied photovoltaic systems. Additionally, it explores AI's transformative potential in water solutions, agriculture, and renewable energy technologies across domains like smart cities, transportation, and healthcare. The insights shared aim to inspire further research, foster discussions, and drive real-world impact toward a resilient, inclusive, and sustainable future. Discusses issues and offers sustainable solutions to meet the challenges faced by today's economy and industry. Presents recent research in the sustainable transformation of engineering and technological systems. Serves as a valuable resource for both academic researchers and industry practitioners interested in Artificial Intelligence, AI, and smart energy sectors.

Social, Cultural, and Behavioral Modeling Robert Thomson, Halil Bisgin, Christopher Dancy, Ayaz Hyder, Muhammad Hussain, 2020-10-10. This book constitutes the proceedings of the 13th International Conference on Social Cultural and Behavioral Modeling SBP BRiMS 2020 which was planned to take place in Washington DC USA. Due to the COVID-19 pandemic, the conference was held online during October 18-21, 2020. The 33 full papers presented in this volume were carefully reviewed and selected from 66 submissions. A wide number of disciplines are represented including computer science, psychology, sociology, communication science, public health, bioinformatics, political science, and organizational science. Numerous types of computational methods are used such as machine learning, language technology, social network analysis, and visualization, agent-based simulation, and statistics.

B2B Marketing Guidebook - Vol. 1 Uwe Seebacher, 2025-07-15. In the age of Industry 5.0, predictive intelligence and accelerated digital transformation, B2B marketing has become the strategic engine of growth and innovation. This first volume of the second significantly updated edition of B2B Marketing brings together over 20 international experts to redefine modern marketing across strategy, systems, and structure. Covering topics such as marketing maturity, MarTech, automation, branding, and agile leadership, this volume offers actionable frameworks, forward-looking insights, and real-world case studies from leading organizations like Fynest, Fujitsu, Hapag-Lloyd, and Predictores. Readers will gain a clear understanding of the B2B Marketing Maturity Model, strategic perspectives on predictive intelligence, and best practices for marketing automation. Essential reading for CMOs, business leaders, marketing professionals, consultants, and academics, this book is a strategic blueprint for the next decade of B2B marketing. The transformation starts here.

Applications of AI in Smart Technologies and Manufacturing S.P. Jani, M. Adam Khan, 2025-10-14. Applications of AI in Smart Technologies and Manufacturing presents a rich repository of groundbreaking research in emerging engineering domains. With contributions from eminent educators, industrialists, scientists, and researchers, this book highlights the transformative role of AI and smart technologies in

enhancing community welfare and shaping the future of manufacturing and engineering practices This title comprises a selection of papers that reflect a global exchange of ideas in digital manufacturing advanced machining processes bioengineering tribology smart materials IoT applications energy storage smart cities robotics and AI applications in healthcare With special emphasis on optimization algorithms virtual and augmented reality in automation and smart energy technologies this volume delves into ways in which rapid technological advancements are breaking traditional barriers in education research and industrial applications This is a resourceful guide for researchers academicians engineers industrial practitioners and graduate students in the domains of mechanical engineering smart technologies artificial intelligence and automation It is also highly relevant to decision makers and R D professionals focused on applying AI and smart solutions to achieve sustainable innovation in engineering and technology

Principles and Practice of American Politics Samuel Kernell, Steven S. Smith, 2018-04-03 *Principles and Practice of American Politics* is a well balanced reader covering all the major topics of an American Government course Blake Jones Ohio Valley University Combining timeless readings with cutting edge articles and essays *Principles and Practice of American Politics Seventh Edition* enriches students understanding of the American political system by examining the strategic behavior of key players in U S politics This collection of classic and contemporary readings brings concepts to life by providing students with real examples of how political actors are influenced by the strategies of others and are governed by the Constitution the law and institutional rules Carefully edited by award winning authors Samuel Kernell and Steven S Smith each reading is put into context to help students understand how political actions fall within a major national political forum New to the Seventh Edition Nine new and updated essays encourage students to reflect on the continuing debates over the polarization of the American electorate and Congress the role of social media and fake news in influencing public views of politicians and issues the fragile Trump coalition the efficacy of polling in tracking public opinion and other issues more relevant than ever in the wake of the 2016 elections Additional essays challenge students to think more carefully about alternative institutions and political arrangements The new essays present institutions of majority rule the nature of racial discrimination and the proper role of the court as less settled issues that provide students an opportunity to think through and discuss their views on the future direction of American civic life Each selection is artfully framed by Kernell and Smith s contextual headnotes to make them appropriate for classroom use Original readings written specifically for the volume give the book a coherent treatment of the performance of U S political institutions

Risk Detection and Cyber Security for the Success of Contemporary Computing Kumar, Raghvendra, Pattnaik, Prasant Kumar, 2023-11-09 With the rapid evolution of technology identifying new risks is a constantly moving target The metaverse is a virtual space that is interconnected with cloud computing and with companies organizations and even countries investing in virtual real estate The questions of what new risks will become evident in these virtual worlds and in augmented reality and what real world impacts they will have in an ever expanding internet of things IoT need to be

answered Within continually connected societies that require uninterrupted functionality cyber security is vital and the ability to detect potential risks and ensure the security of computing systems is crucial to their effective use and success Proper utilization of the latest technological advancements can help in developing more efficient techniques to prevent cyber threats and enhance cybersecurity Risk Detection and Cyber Security for the Success of Contemporary Computing presents the newest findings with technological advances that can be utilized for more effective prevention techniques to protect against cyber threats This book is led by editors of best selling and highly indexed publications and together they have over two decades of experience in computer science and engineering Featuring extensive coverage on authentication techniques cloud security and mobile robotics this book is ideally designed for students researchers scientists and engineers seeking current research on methods models and implementation of optimized security in digital contexts Handbook of Economic Expectations Ruediger Bachmann, Giorgio Topa, Wilbert van der Klaauw, 2022-11-04 Handbook of Economic Expectations discusses the state of the art in the collection study and use of expectations data in economics including the modelling of expectations formation and updating as well as open questions and directions for future research The book spans a broad range of fields approaches and applications using data on subjective expectations that allows us to make progress on fundamental questions around the formation and updating of expectations by economic agents and their information sets The information included will help us study heterogeneity and potential biases in expectations and analyze impacts on behavior and decision making under uncertainty Combines information about the creation of economic expectations and their theories applications and likely futures Provides a comprehensive summary of economics expectations literature Explores empirical and theoretical dimensions of expectations and their relevance to a wide array of subfields in economics
