Growing Up on the Gridiron Vicki Mayk, 2020-09-01 Explores the experience of one young man and the concerns about CTE he helped to illuminate and the cultural allure of football in America that keeps boys trying to make the team despite the dangers. Award-winning journalist Vicki Mayk raises a critical question for football players and their communities: does loving a sport justify risking your life? This is the insightful and deeply human story of Owen Thomas, a star football player at Penn who took his own life when he was 21, the result of the pain and anguish caused by chronic traumatic encephalopathy (CTE). It was Owen's landmark case which demonstrated that a player didn't need years of head-bashing in the NFL or even multiple sustained brain concussions to cause the mind-altering, life-threatening degenerative disease known as CTE. And Owen's case could not have come to light without Dr. Ann McKee, the neuropathologist who bucked conventional wisdom and the football establishment as she examined Owen's brain and its larger significance, building an ever-stronger case that said, at the very least, football should not be played by children under the age of 14. With its focus on a single life and the community touched by it, Owen's family, his teammates and friends, his teachers and coaches, and later Dr. McKee, *Growing Up on the Gridiron* explores the place of football in our lives. It doesn't make a heavy-handed argument to abandon the sport. Rather, it explores why football matters so deeply to many young men and why they continue to take risks despite the evidence of serious long-term harm.
