History Preparatory Examination September 2014:

Doing Justice to History Barrie Sander, 2021-03-09 As communities struggle to make sense of mass atrocities expectations have increasingly been placed on international criminal courts to render authoritative historical accounts of episodes of mass violence Taking these expectations as its point of departure this book seeks to understand international criminal courts through the prism of their historical function The book critically examines how such courts confront the past by constructing historical narratives concerning both the culpability of the accused on trial and the broader mass atrocity contexts in which they are alleged to have participated The book argues that international criminal courts are host to struggles for historical justice discursive contests between different actors vying for judicial acknowledgement of their interpretations of the past By examining these struggles within different institutional settings the book uncovers the legitimating qualities of international criminal judgments In particular it illuminates what tends to be foregrounded and included within as well as marginalised and excluded from the narratives of international criminal courts in practice What emerges from this account is a sense of the significance of thinking about the emancipatory limits and possibilities of international criminal courts in terms of the historical narratives that are constructed and contested within and beyond the courtroom

The History of the European Union Giuliano Amato, Enzo Moavero-Milanesi, Gianfranco Pasquino, Lucrezia Reichlin, 2019-02-07 The European Union celebrated its 60th anniversary in 2017 but celebrations were muted by Brexit and the growing sense of a crisis of identity However as this seminal work shows the history and ambition of the European Union are considerable Written by key stakeholders who between them acted as architects adjudicators and arbitrators of the project it presents the definitive history of the first two generations of the European Union This book revisits the birth and consolidation of the great project of a united Europe and the political institutional judicial and economical frameworks of the European Union from the process towards integration to the advancements and the impasses in building a political union

Selderhuis, 2014-12-10 Herman Selderhuis as editor of this volume has brought together a team of experts resulting in a unique approach since each chapter is co-written by a catholic and a protestant author who have all integrated the latest research results Each section begins with a brief historiographical overview The same time ecclesiastical events are always set within a greater framework of political social and cultural developments for which reason each author has taken the liberty to describe its own method The user will find in this book tables diagrams and illustrations Also many source texts are integrated in the narration These texts are intended to bring the described events and people closer to the reader and as it were to let them speak the words The name of the book as Handbook of the church history of the Netherlands immediately brings to mind three problematic complexes which are relevant to its user First there is the nature of a handbook that is intended to be a good tool but also has its limitations it stimulates and necessitates the use of further books Second the area The Netherlands is a plurality and that is also noticeable in its church history for each region town and village has its own

church history Third the history of the church for sure is the most important aspect but this history can only be understood if it is described in the context of political and social developments *Gerald Howard-Smith and the 'Lost Generation' of Late Victorian and Edwardian England* John Benson,2016-11-18 Gerald Howard Smith s life is intriguing both in its own right and as a vehicle for exploring the world in which he lived Tall boisterous and sometimes rather irascible he was one of the so called Lost Generation whose lives were cut short by the First World War Brought up in London and educated at Eton and Cambridge he excelled both at cricket and athletics After qualifying as a solicitor he moved to Wolverhampton and threw himself into the local sporting scene making a considerable name for himself in the years before the First World War Volunteering for military service in 1914 he was decorated for bravery before being killed in action two years later Reporting his death the War History of the South Staffordshire Regiment claimed that In his men s eyes he lived as a loose limbed hero and in him they lost a very humorous and a very gallant gentleman As well as telling the fascinating story of Gerald Howard Smith for the first time this important new biography explores such complex and important issues as childhood and adolescence class relations sporting achievement manliness and masculinity metropolitan provincial relationships and forms of commemoration It will therefore be of interest to educationalists sports historians local and regional historians and those interested in class gender and civilian military relations indeed all those seeking to understand the economic social and cultural life of late nineteenth and early twentieth century Britain *The New Fire* Ben Buchanan,Andrew Imbrie,2024-03-05 AI is revolutionizing the world Here s how democracies can come out on top Artificial intelligence is revolutionizing the modern world It is ubiquitous in our homes and offices in the present and most certainly in the future Today we encounter AI as our distant ancestors once encountered fire If we manage AI well it will become a force for good lighting the way to many transformative inventions If we deploy it thoughtlessly it will advance beyond our control If we wield it for destruction it will fan the flames of a new kind of war one that holds democracy in the balance As AI policy experts Ben Buchanan and Andrew Imbrie show in *The New Fire* few choices are more urgent or more fascinating than how we harness this technology and for what purpose The new fire has three sparks data algorithms and computing power These components fuel viral disinformation campaigns new hacking tools and military weapons that once seemed like science fiction To autocrats AI offers the prospect of centralized control at home and asymmetric advantages in combat It is easy to assume that democracies bound by ethical constraints and disjointed in their approach will be unable to keep up But such a dystopia is hardly preordained Combining an incisive understanding of technology with shrewd geopolitical analysis Buchanan and Imbrie show how AI can work for democracy With the right approach technology need not favor tyranny

process as he journeys from the Cuban Missile Crisis to crafting a defense strategy in the Carter Administration to offset the Soviets numeric superiority in conventional forces to presiding over the dismantling of more than 8 000 nuclear weapons in the Clinton Administration and to his creation in 2007 with George Shultz Sam Nunn and Henry Kissinger of the Nuclear Security Project to articulate their vision of a world free from nuclear weapons and to lay out the urgent steps needed to reduce nuclear dangers Perry s authoritative memoir is a clear sobering and for many surprising warning that the danger of a nuclear catastrophe today is actually greater than it was during that era of U S Soviet competition a significant and insightful memoir and a necessary read Mortimer B Zuckerman U S News World Report
