Informing with the Case Method T. Grandon Gill, 2011. There are a number of marvelous books that address the topic of the case method. If you are interested in facilitating cases, you can look to the classic book *Teaching and the Case Method* by Louis Barnes, C. Roland Christensen and Abby Hansen (1994). The collection of essays on the subject *Education for Judgment: The Artistry of Discussion Leadership* by C. Roland Christensen, David Garvin and Ann Sweet (1991) is a wonderful and inspiring read as well. If your interest is case-based research, it would be nearly impossible to find a more authoritative source than Robert Yin's (2009, 4th Edition) *Case Study Research: Design and Methods*, which at last count has been cited nearly 29,000 times according to Google Scholar. There is even a new entry to the field: William Ellet's (2007) *The Case Study Handbook: How to Read, Discuss, and Write Persuasively about Cases*, which is specifically aimed at the student. At first glance, then, the topic of case studies in education and research seems to be pretty well covered. Do we really need another book on the subject? I write this book believing the answer is yes. While I have great affection for the classics, there are a number of issues facing most business faculty, not to mention faculty members from disciplines outside of business, that these books simply do not address. In writing this book, my intention is to offer some thoughts on some of these. Paradoxically, these omissions arise from the very fact that the authors of the classics are undisputed masters of their craft. Why this is a problem should become clear as I identify the three areas of focus for this book. The first issue that I feel must be considered is using the case method with a novice audience. Consider the following: When I was enrolled in the MBA program at Harvard Business School (HBS) in the early 1980s, the curriculum consisted of nearly 900 case discussions, 15 per week and perhaps as many as 20 class periods given over to lecture-style presentations. When I teach a case method graduate course at my own institution on the other hand, I am constrained to 11 case discussions a 12-week semester. As it happens, I am also the only course in the entire program that employs pedagogy reasonably faithful to the case method as it is normally defined. The math is very simple. By the last day of my semester, my students have as much experience discussing cases as I did on Thursday afternoon of the first week of my two-year MBA program at HBS. With the exception of faculty teaching at those rare institutions that have chosen

to widely adopt the case method the situation I face is commonplace The second concern that existing books raise for me is their tendency to focus on isolated topics Specifically case facilitation case writing and case research are treated as separable activities I would argue that these three aspects of the case method which I define quite broadly are inseparable For institutions that wish to achieve the full set of benefits provided by the case method all three activities must be pursued in parallel Perhaps this is why so few institutions have achieved success through the case method In this book I will argue that achieving such integration is precisely why those rare institutions have been so successful Once you start believing that the case method can be a key to institutional success how you get there becomes a real challenge At leading institutions featuring the case method such as HBS the philosophy is largely learned through a period of apprenticeship For example I did not encounter any of the references mentioned in the first paragraph excepting Yin at any time during my 5 year doctorate at HBS Instead I went out and wrote cases facilitated discussions and did research under the guidance of faculty members who were masters of the craft How can someone without the benefit of such an experience acquire such mastery While I cannot offer any promises in this regard I will at least provide some examples and easy to follow checklists that may be of service to individuals getting started

The Profiteers Christopher Marquis, 2024-05-14 An exposé of how society pays for corporations free lunch and the cost of environmental damage low wages systemic discrimination and cheap goods In an age when business leaders solemnly profess dedication to principles of environmental and social justice Christopher Marquis's provocative investigation into the real costs of doing business reveals the way that leaders of the corporate world gaslight to evade responsibilities by privatizing profits and socializing costs Who pays for the resulting climate and environmental damage racism low wages and cheap goods the average citizen and the taxpayer By bringing to light ideas that today are on the fringe but rapidly making their way into the mainstream Marquis outlines a new regenerative paradigm for business in society He tells of a group of pioneers trying to not just reform but transform the way business is conducted all over the world By taking novel actions to reimagine business operations in responsible ways minimize their negative impacts and create new ways for business to properly absorb their hidden costs these leaders provide blueprints to move the needle on vexing social and environmental issues What's in it for leaders of the corporate world The model of reform presented provides clear guidance on how to get ahead of the curve as an emerging economic order is formed No business can lead from the front if it is morally backward looking History has shown time and again that those who get out in front of emerging changes in our social and environmental landscape protect themselves from inevitable eclipse
