Second International Handbook on the Demography of Sexuality Amanda K. Baumle, Zelma Oyarvide Tuthill, 2025-06-18 A decade after the publication of the first International Handbook on the Demography of Sexuality there have been fundamental shifts in how we measure sexual and gender identities and the breadth of available population level sexuality data The chapters in this second edition of this handbook provide guidance on methodological approaches involved in studying population sexuality as well as insight into the ways that sexuality shapes key demographic outcomes Chapters examine how we measure sexual identities and behaviors on surveys sexuality changes across the life course international perspectives on sexual behaviors and identities and the ways that sexual identities shape families labor market experiences and health outcomes Despite these developments we still know relatively little about key demographic questions related to fertility and migration for sexual minorities as well as about understudied topics of

sexuality that fall outside of risk focused analyses In particular much of our understanding of sexuality has been motivated by controlling the spread of sexually transmitted infections or adolescent pregnancies rather than understanding motivations for sexual interactions such as pleasure Accordingly although the research set forth in this book provides insight into existing knowledge of sexual behavior and of sexual minority populations the chapters also point researchers and policymakers toward needed areas of research and data collection

Cervical Screening Awareness Week 2023: Integrating Cervical Cancer Screening and Precancer Treatments Leeya Pinder, Manoj Menon, Noleb Mugisha, 2025-06-09 June 19 to 24 is the Cervical Screening Awareness Week and at Frontiers in Oncology we want to highlight the recent discoveries in the field and raise awareness of the importance of early diagnosis multidisciplinary management and technological innovation support Despite effective methods to both prevent and screen for cervical cancer invasive cervical cancer ICC remains a leading cause of morbidity and mortality globally Indeed ICC is the most common cause of cancer related death in many low and middle income countries LMIC including much of sub Saharan Africa Although the screening modalities vary among resource abundant and resource limited regions the benefits of resource relevant screening are clear Notwithstanding there are multiple individual and societal barriers to implementing cervical cancer screening including limited health education and literacy fatalism fear scarcity of services and cost These barriers have constrained widespread utilization even when such services are available As such patients often present with advanced disease at initial presentation and suffer poor health outcomes Given the multiple barriers to cervical cancer screening alternate methods utilizing the existing healthcare

infrastructure need to be explored Clinical services in LMICs are often funded and provided in a vertical fashion with the appropriate integration of relevant infrastructure Because many health systems do not have a primary care model of service delivery there has been increased recognition of the need to leverage and incorporate non communicable disease NCDs care including cancer care within the existing routine services The benefit of such integration has been demonstrated for certain NCDs including hypertension and diabetes However despite the clinical burden such an integrated approach has not been fully evaluated for the early detection of cervical cancer and precancer care treatment In a systematic review and meta analysis of cervical cancer screening in SSA researchers found that among the 29 studies conducted between 2000 and 2019 cervical cancer screening was performed in just under 13% of over 35 000 women included Locally relevant research on strategies to optimize the early detection of cervical cancer and precancer treatment are clearly necessary For cervical cancer screening the WHO recommends a screen and treat approach using any of the available methods visual inspection with acetic acid VIA cytology and human papillomavirus HPV testing Precancer treatment options include cryotherapy thermal ablation and large loop excision of the transformation zone LLETZ The selection of screening and treatment modalities are largely driven by resource availability We welcome Case Reports Clinical Trials Community Case Studies General Commentary Methods Mini Reviews Opinions Original Research Perspective Review and Systematic Reviews that describe research integrating cervical cancer screening and precancer treatment programs within other health programs e g HIV care and treatment programs family planning services Please note that manuscripts consisting solely of bioinformatics computational analysis or predictions of public databases which are not accompanied by validation independent cohort or biological validation in vitro or in vivo will not be accepted in any of the sections of Frontiers in Oncology
