a growing concern of our times and clearly questions the way we think of animal and environmental health This original account of rabies challenges conventional approaches of separation and extermination arguing instead that a One Health approach is our best chance at fostering mutual survival in a world increasingly overpopulated by humans animals and deadly pathogens

The Human Right to Water Nandita Singh,2016-10-06 The discourse on the human right to water presents deliberations on the concept content and rationale for the right with little attention to the practical question of translating the right into reality This book aims to fill this void by focusing on realization of the right by its holders examining how effective the mechanisms are for implementing the right in enabling its universal realization In a quest to answer this question the book draws a conceptual differentiation between implementation and realization of the right arguing that unlike implementation which is an objective process of creation and implementation of measures such as legal frameworks institutional structures or policy and action guidelines realization of the right is a subjective process that

extends much beyond It takes shape within specific contextual settings which may include varied situations yet remains neglected in the related academic and action forums This book attempts to address this void by discussing some of the most significant contexts and the underlying problems and concerns that strongly influence realization of the human right to water It contends that if the right is to be truly realized these different contexts which can be further classified as objective and subjective must be understood analysed and appropriately addressed before framing and implementing relevant action The book further situates the human right to water discourse in a broader interdisciplinary perspective expanding its scope beyond the narrower legal dimensions linking it to the wider field of water resources management governance Through the novel ideas it proposes the book makes an innovative and unique contribution in the field of human right to water which is of great scientific value
