Dennis, 2011-08-16 A call for a paradigm shift in human thinking in recognition of the interconnectedness of all things a new mind for a new world Explains how the instability of our current time is part of a larger cycle of human evolution that will soon turn toward renewal and regeneration Reveals how to participate in the process of conscious evolution to maintain resilience during these transitional times Examines new findings in quantum physics and quantum biology on the interconnectivity of all life and how to utilize this for conscious evolution For centuries indigenous wisdom traditions have talked of an epochal shift on the horizon of a spiritual renaissance for the earth and her living family Now the timelines are converging and the potential for an energetic upgrade for humanity is here but first we must survive and evolve through the current period of transition Explaining that evolution is not a gradual process but more like a shock to the system radical waves of transformation after a period of dormancy author Kingsley Dennis reveals that we are currently undergoing an evolutionary leap and shows not only how to survive but also thrive in this period of global upheaval and change Examining the nature of evolutionary cycles he explains that the instability we are now experiencing climate change economic meltdowns and increasing political polarization is the convergence of complex systems that have reached a critical state What we need in order to push through to the coming spiritual renaissance is a paradigm shift in human thinking and perception a conscious evolution in recognition of the interconnectedness of all things a new mind for a new world Examining new findings in quantum physics and quantum biology on the interconnectivity of all life as well as opportunities for us to reawaken our slumbering souls this book offers a glimpse of the new global society to come a renewed humanity for the 21st century and how each of us can best participate during the process of planetary transformation *Transhumanism: The Proper Guide to a Posthuman Condition or a Dangerous Idea?* Wolfgang Hofkirchner, Hans-Jörg Kreowski, 2020-12-12 This book examines the contributions of the transhumanism approach to technology in particular the contributed chapters are wary of the implications of this popular idea The volume is organized into four parts concerning philosophical military technological and sociological aspects of transhumanism but the reader is free to choose various reading patterns Topics discussed include gene editing the singularity ethical machines metaphors in AI mind uploading and the philosophy of art and some perspectives taken or discussed examine transhumanism within the context of the philosophy of technology transhumanism as a derailed anthropology and critical sociological aspects that consider transhumanism in the context of topical concerns such as whiteness maleness and masculinity The book will be of value to researchers engaged with artificial intelligence and the ethical societal and philosophical impacts of science and technology *Journal of the Engineers' Club of Philadelphia and Affiliated Societies*, 1923 **The Bloomsbury Handbook of Literary and Cultural Theory** Jeffrey R. The Invention of Humanity Siep Stuurman,2017-02-20 For much of history strangers were seen as barbarians seldom as fellow human beings The notion of common humanity had to be invented Drawing on global thinkers Siep Stuurman traces ideas of equality and difference across continents and civilizations from antiquity to present day debates about human rights and the clash of civilizations **In Praise of Historical Anthropology** Alexandre Coello de la Rosa,Josep Lluís Mateo

Dieste,2020-01-24 In Praise of Historical Anthropology is based on a fundamental conviction the study of society cannot be undertaken without considering the weight of history and separations between disciplines in academics need to be bridged for the benefit of knowledge Anthropology cannot be limited to situating its object in its immediate context rather its true subject of study is society as a historical problem The book describes the complex attempts to transcend this separation presenting perspectives methodologies and direct applications for the study of power relations and systems of social classification paying special attention to the reconstruction of colonial situations Following the maxim expounded by John and Jean Comaroff this book will help us understand that historical anthropology is not a matter of merging the two disciplines of anthropology and history but rather considering societies in their historically situated dimension and applying the tools of the social and human sciences to the analysis In this vein the book reviews the complex attempts to bridge disciplinary separations and theoretical proposals coming from very different traditions The text consequently opens up hegemonic perspectives to include other anthropologies Proceedings of the Engineers' Club of Philadelphia ,1923

Roses at Dawn in an Ice Age World Rolf Witzsche,2005 Mankind is the child of the Ice Age Our more than 2 million year history extends through the entire Pleistocene Ice Age Epoch We were shaped by the need to be creative to survive and still are Now that our warm interglacial epoch is nearly over we find ourselves challenged to be creative once again as the global agriculture and with it our food supply will be radically diminished once we get back into the Ice Age World Can we protect our agriculture in indoor facilities That sounds like science fiction right It will take a hundred years to do it But will we upgrade our human dimension to do it especially in the way we relate to one another as human beings We are deeply divided to the very grassroots social level and isolated The needed Ice Age Renaissance requires a taller foundation The novel explores the countless dimensions that are involved in breaking the ice in our social domain at the level of sexual and marital

division and isolation towards becoming sublime as human beings The great renaissance principles of universal love and of the advantage of the other are threaded through the story putting a new light on sex and marriage relationships and expanding them into the universal dimension This novel is Episode 2B of the science fantasy series The Lodging for the Rose by Rolf A F Witzsche
