Commission United States. Congress. Senate. Committee on Armed Services,United States. Congress. Senate. Committee on Armed Services. Subcommittee on Personnel,2015 *Mastering Healthcare Regulation: A Comprehensive Case Study Approach* Jessica Holmes,Robin J. Lunge,Betty Rambur,2024-04-30

Trying to make sense of the regulatory landscape in healthcare can be difficult The many federal and state entities and their rules may work together yet they sometimes contradict one another Mastering Healthcare Regulation will help readers understand and ultimately navigate the numerous layers of regulatory oversight within the healthcare system This book clarifies laws and regulations with straightforward explanations and case studies that place readers in the shoes of regulatory decision makers The first section presents an overview of healthcare regulation including market dynamics and the interactions between the various regulatory organizations Each section that follows focuses on a broad subject that regulations seek to address cost containment consumer protection payment and delivery system reform and patient access health and safety Background is provided on each issue and real world scenarios are used to illustrate regulatory approaches and their economic legal and clinical ramifications The book will teach readers how to decipher the regulatory landscape s complexities and how to influence regulations rather than simply being impacted by them **Making Medicines Affordable** National Academies of Sciences,

Engineering, and Medicine,Health and Medicine Division,Board on Health Care Services,Committee on Ensuring Patient Access to Affordable Drug Therapies,2018-03-01 Thanks to remarkable advances in modern health care attributable to science engineering and medicine it is now possible to cure or manage illnesses that were long deemed untreatable At the same time however the United States is facing the vexing challenge of a seemingly uncontrolled rise in the cost of health care Total medical expenditures are rapidly approaching 20 percent of the gross domestic product and are crowding out other priorities of national importance The use of increasingly expensive prescription drugs is a significant part of this problem making the cost of biopharmaceuticals a serious national concern with broad political implications Especially with the highly visible and very large price increases for prescription drugs that have occurred in recent years finding a way to make prescription medicines and health care at large more affordable for everyone has become a socioeconomic imperative Affordability is a complex function of factors including not just the prices of the drugs themselves but also the details of an individual s insurance coverage and the number of medical conditions that an individual or family confronts Therefore any solution to the affordability issue will require considering all of these factors together The current high and increasing costs of prescription drugs coupled with the broader trends in overall health care costs is unsustainable to society as a whole Making Medicines Affordable examines patient access to affordable and effective therapies with emphasis on drug pricing inflation in the cost of drugs and insurance design This report explores structural and policy factors influencing drug pricing

drug access programs the emerging role of comparative effectiveness assessments in payment policies changing finances of medical practice with regard to drug costs and reimbursement and measures to prevent drug shortages and foster continued innovation in drug development It makes recommendations for policy actions that could address drug price trends improve patient access to affordable and effective treatments and encourage innovations that address significant needs in health care

Socio-economics of Personalized Medicine in Asia Shirley Sun,2016-07-01 The second decade of the twenty first century has witnessed a surging interest in personalized medicine with the concomitant promise to enable more precise diagnosis and treatment of disease and illness based upon an individual s unique genetic makeup In this book my goal is to contribute to a growing body of literature on personalized medicine by tracing and analyzing how this field has blossomed in Asia In so doing I aim to illustrate how various social and economic forces shape the co production of science and social order in global contexts This book shows that there are inextricable transnational linkages between developing and developed countries and also provides a theoretically guided and empirically grounded understanding of the formation and usage of particular racial and ethnic human taxonomies in local national and transnational settings The Open Access version of this book available at <http://www.taylorfrancis.com/doi/view/10.4324/9781315537177> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Defense Acquisition Trends, 2015 Jesse Ellman,Andrew P. Hunter,Rhys McCormick,Gregory Sanders,2016-02-19 This study examines contracting trends at the U S Department of Defense DoD It relies on empirical analysis of DoD contracting transaction data from the open source Federal Procurement Data System FPDS The authors seek to identify and study emergent trends in the contracting data and marry that analysis with discussion of changing goals and methods for the larger acquisition system

Plant Microtechniques and Protocols Edward Chee Tak Yeung,Claudio Stasolla,Michael John Sumner,Bing Quan Huang,2015-09-19 A proper understanding of the structural organization of the plant body is essential to any study in plant biology Experimental studies in vivo and in situ will lead to structural physiological and cellular changes of the experimental material To study macroscopic and microscopic changes different histological methods and microtechniques can be used as they provide valuable information of the experimental system In addition the observed structural changes allow investigators to set hypothesis for further studies based on one s own observation Thus proper selection and utilization of microtechniques are a must for the success of a research program At present an up to date collection of protocols are not readily available in the literature The latest work in plant microtechniques was published in 1999 by Ruzin but many others are no longer in print e g Jensen 1964 O Brien and McCully

1981 Furthermore a majority of published works focus on techniques related to general processing and staining procedures A comprehensive treatment that encompasses broader applications of microtechniques to other disciplines is lacking e g archeology wood science etc There is a need to create a comprehensive volume of botanical methods and protocols which includes traditional and novel techniques that can be used by researchers in plant science and investigators in other disciplines that require plant microtechniques in their research and teaching This book covers a wide variety of applications and brings them up to date to make them understandable and relevant especially to students using the methods for the first time It is our intention to create a useful reference for plant histology and related methods that will serve as a foundation for plant scholars researchers and teachers in the plant sciences

Building a Culture of Health John A. Quelch, Emily C.
