The Greened House Effect Jeff Wilson, 2013-05-24 With greater public awareness of the need for energy independence the issue of how we can make our existing homes more resource efficient is becoming ever more critical Residential buildings make up a large fraction of our energy needs largely due to heating and air conditioning So it s no longer enough to simply do the small stuff like switching to compact fluorescent bulbs or turning down the thermostat at night In *The Greened House Effect* author Jeff Wilson brings his twenty five years of construction experience and knowledge of home building to bear on making our current houses cleaner greener and healthier Think of a deep energy retrofit DER as a home makeover one that represents a significant investment but that saves money from the get go by capturing the energy you drop on the ground every month every year through inefficiency poor design or simply living in a typical older home Using his own family s DER of their 1942 home as a prime example Wilson weaves a readable narrative at a practical

hammer and nail level He presents the solutions to our building and energy problems making them seem possible for average homeowners and small contractors by offering the right set of information skills and materials More technical information is presented in sidebars and graphs and numerous color photos illustrate the process including Testing the energy efficiency of your home and learning where improvements need to be made Issues of local building codes and regulations Financing and paying for a DER Major components of the DER such as roofs exterior walls basements and home systems Wilson s building experience along with his lifelong passion for energy issues all come together to form an inspirational can do approach to making our neighborhood our community our nation and our world a better place one home at a time **Hvac: Everything**
